CONTENTS

NUMBER 1, JANUARY 1971

Endogenous production of carbon monoxide in normal and erythroblastotic newborn infants. *M. Jeffrey Maisels, Ambadas Pathak, Nicholas M. Nelson, David G. Nathan, and Clement A. Smith* 1

Distribution and fate of ^{54}Mn in the monkey: studies of different parts of the central nervous system and other organs. *Darab K. Dastur, Daya K. Manghani, and K. V. Raghavendran* 9

Radioimmunoassay of human parathyroid hormone in serum. *Claude D. Arnaud, Hang S. Tsao, and Travis Littledike* 21

Urate-2-^{14}C transport in the rat nephron. *Ronald A. Kramp, William E. Lassiter, and Carl W. Gottschalk* 35

Resting transmembrane potential difference of skeletal muscle in normal subjects and severely ill patients. *J. N. Cunningham, Jr., N. W. Carter, F. C. Rector, Jr., and D. W. Seldin* 49

Erythroid cell RNase: activation by urea and localization to the cell membrane. *Edward R. Burka* .. 60

Characteristics of NaCl and water transport in the renal proximal tubule. *Juha P. Kokko, Maurice B. Burg, and Jack Orloff* 69

Demonstration of independent roles of proximal tubular reabsorption and intratubular load in the phenomenon of glomerulotubular balance during aortic constriction in the rat. *Wolf E. Buentig and Laurence E. Earley* 77

Capacity of human subjects to utilize keto analogues of valine and phenylalanine. *Daniel Rudman* ... 90

"Essential" hypernatremia due to ineffective osmotic and intact volume regulation of vasopressin secretion. *Frederick R. DeRubertis, Michael F. Michelis, Nama Beck, James B. Field, and Bernard B. Davis* 97

Depression of proximal tubular sodium reabsorption in the dog in response to renal beta adrenergic stimulation by isoproterenol. *John R. Gill, Jr., and Alfred G. T. Casper* 112

Angiotensin II in arterial and renal venous plasma and renal lymph in the dog. *Michael D. Bailie, Floyd C. Rector, Jr., and Donald W. Seldin* 119

Inherited propionyl-CoA carboxylase deficiency in "ketotic hyperglycinemia." *Y. Edward Hsia, Katherine J. Scully, and Leon E. Rosenberg* 127

Cyclic 3′,5′-adenosine monophosphate in human blood platelets. II. Effect of N^6-2′-0-dibutyryl cyclic 3′,5′-adenosine monophosphate on platelet function. *Edwin W. Salzman and Linda Levine* 131

Studies on hyperkalemic periodic paralysis. Evidence of changes in plasma Na and Cl and induction of paralysis by adrenal glucocorticoids. *David H. P. Streeten, Theodore G. Dalakos, and Herbert Fellerman* 142

Distribution, turnover, and mechanism of renal excretion of amylase in the baboon. *William C. Duane, Roger Frerichs, and Michael D. Levitt* 156

Ethanol-induced hyperlacticacidemia: inhibition of lactate utilization. *Robert A. Kreisberg, W. Crawford Owen, and Alan M. Siegal* 166

Glucose-lactate interrelationships: effect of ethanol. *Robert A. Kreisberg, Alan M. Siegal, and W. Crawford Owen* 175

Acquired attenuation of chemoreceptor function in chronically hypoxic man at high altitude. *John V. Weil, Edward Byrne-Quinn, Ingvar E. Sodal, Giles F. Filley, and Robert F. Grover* 186

Electrophoretic and functional variants of NADH-methemoglobin reductase in hereditary methemoglobinemia. *Hsin-Soon Hsieh and Ernst R. Jaffé* 196

Erythropoietic protoporphyria: evidence for multiple sites of excess protoporphyrin formation. *Perry Scholnick, Harvey S. Marver, and Rudi Schmid* 203

The influence of graded degrees of chronic hypercapnia on the acute carbon dioxide titration curve. *Marc B. Goldstein, F. John Gennari, and William B. Schwartz* 208

Experimental myocardial infarction. VIII. Chronotropic augmentation of cardiac function in left ventricular failure of acute and healing stages in intact conscious dogs. *Raj Kumar, Julio Joison, David P. Gilmour, Farouk A. Molokhia, C. A. S. Pegg, and William B. Hood, Jr.* 217

The effect of salicylate on the metabolism of normal and stimulated human lymphocytes in vitro. *Lauren M. Pachman, Nancy B. Esterly, and Raymond D. A. Peterson* 226

On the mechanism of renal potassium wasting in renal tubular acidosis associated with the Fanconi syndrome (type 2 RTA). *Anthony Sebastian, Elisabeth McSherry, and R. Curtis Morris, Jr.* 231
Immunologic differentiation of classic hemophilia (factor VIII deficiency) and von Willebrand's disease. With observations on combined deficiencies of antihemophilic factor and proaccelerin (factor V) and on an acquired circulating anticoagulant against antihemophilic factor. *Theodore S. Zimmerman, Oscar D. Ratnoff, and Arnold E. Powell* 244
Detection of carriers of classic hemophilia using an immunologic assay for antihemophilic factor (factor VIII). *Theodore S. Zimmerman, Oscar D. Ratnoff, and Arthur S. Littell* 255

NUMBER 2, FEBRUARY 1971

Serum cholesterol esterifying and cholesteryl ester hydrolyzing activities in liver diseases: relationships to cholesterol, bilirubin, and bile salt concentrations. *Don P. Jones, Freddy R. Sosa, Jack Shartsis, Praful T. Shah, Eileen Skromak, and William T. Beher* 259
Response of the rheumatoid synovial membrane to exogenous immunization. *Jerome H. Herman, John Bradley, Morris Ziff, and J. Donald Smiley* 266
Comparison of the HL-A phenotypes of lymphocytes and kidney cells determined by the fluorochromasia cytotoxicity assay. *Kathryn S. Douglas, Herbert A. Perkins, Kent Cochrum, and Samuel L. Kountz* 274
The occurrence of cryoproteins in synovial fluid; the association of a complement-fixing activity in rheumatoid synovial fluid with cold-precipitable protein. *Robert L. Marcus and Alexander S. Townes* 282
A microperfusion study of sucrose movement across the rat proximal tubule during renal vein constriction. *Norman Bank, William E. Yarger, and Hagop S. Aynedjian* 294
Inhibition of transepithelial sodium transport in the frog skin by a low molecular weight fraction of uremic serum. *Jacques Bourgoignie, Saulo Klahr, and Neal S. Bricker* 303
Ion transport during cholera-induced ileal secretion in the dog. *William L. Moore, Jr., Fred A. Bieberdorf, Stephen G. Morawski, Richard A. Finkelstein, and John S. Fordtran* 312
Action of neomycin on the intraluminal phase of lipid absorption. *Gilbert R. Thompson, James Barrowman, Louis Gutierrez, and R. Hermon Dowling* 319
Studies of a hypomorphic variant of human C3. *Chester A. Alper and Fred S. Rosen* 324
Changes in bone sodium and carbonate in metabolic acidosis and alkalosis in the dog. *James M. Burnell* 327
Serum level of erythropoietin in anemias associated with chronic infection, malignancy, and primary hematopoietic disease. *Harry P. Ward, John E. Kurnick, and Michael J. Pisarczyk* 332
Postglomerular vascular protein concentration: evidence for a causal role in governing fluid reabsorption and glomerulotubular balance by the renal proximal tubule. *Barry M. Brenner and Julia L. Troy* 336
Association of autoantibodies to different nuclear antigens with clinical patterns of rheumatic disease and responsiveness to therapy. *Gordon C. Sharp, William S. Irvin, Robert L. LaRoque, Carmen Velez, Virginia Daly, A. D. Kaiser, and Halsted R. Holman* 350
Immunologic and cellular changes accompanying the therapy of pollen allergy. *D. A. Levy, L. M. Lichtenstein, E. O. Goldstein, and K. Ishizaka* 360
Platelet storage at 22°C; metabolic, morphologic, and functional studies. *Scott Murphy and Frank H. Gardner* 370
Alterations in thyroid hormone economy during acute infection with *Diplococcus pneumoniae* in the rhesus monkey. *Kenneth A. Woeber* 378
Synthesis of hemoglobin Gunn Hill: increased synthesis of the heme-free β^{GH} globin chain and subunit exchange with a free α-chain pool. *Ronald F. Rieder* 388
Glutathione-dependent peroxidative metabolism in the alveolar macrophage. *Molly T. Vogt, Catherine Thomas, Charles L. Vassallo, R. E. Basford, and J. Bernard L. Gee* 401
Metabolic response to human growth hormone during prolonged starvation. *Philip Felig, Errol B. Marliss, and George F. Cahill, Jr.* 411
Disproportionate inhibition of sodium reabsorption in the unilaterally diseased kidney of dog and man after an acute saline load. *Frank D. Gutmann and Richard E. Rieselbach* 422

Cyclic adenosine 3′,5′-monophosphate in human lymphocytes. Alterations after phytohemagglutinin stimulation. *Jay W. Smith, Alton L. Steiner, W. Marcus Newberry, Jr., and Charles W. Parker* . . 432
Human lymphocyte metabolism. Effects of cyclic and noncyclic nucleotides on stimulation by phytohemagglutinin. *Jay W. Smith, Alton L. Steiner, and Charles W. Parker* 442
Hormonal regulation of human lower esophageal sphincter competence: interaction of gastrin and secretin. *Sidney Cohen and William Lipshutz* 449
Folates in plasma and bile of man after feeding folic acid-^{3}H and 5-formyltetrahydrofolate (folinic acid). *Roy F. Pratt and Bernard A. Cooper* 455

Number 3, March 1971

Mechanochemistry of cardiac muscle. V. Influence of thyroid state on energy utilization. *C. Lynn Skelton, Peter E. Pool, Shirley C. Seagren, and Eugene Braunwald* 463
Spontaneous fibrinolysis in pulmonary embolism. *James E. Wilson III, Eugene P. Frenkel, Alan K. Pierce, Robert L. Johnson, Jr., Edward R. Winga, George C. Curry, and Donald S. Mierzwiak* 474
Hypoxemia in pulmonary embolism, a clinical study. *James E. Wilson III, Alan K. Pierce, Robert L. Johnson, Jr., Edward R. Winga, W. Ross Harrell, George C. Curry, and Charles B. Mullins* . . . 481
On the pathogenesis of hyperparathyroidism in chronic experimental renal insufficiency in the dog. *Eduardo Slatopolsky, Sali Caglar, J. P. Pennell, Dennis D. Taggart, Janet M. Canterbury, Eric Reiss, and Neal S. Bricker* 492
Liver galatose-1-phosphate uridyl transferase: activity in normal and galactosemic subjects. *Stanton Segal, Shirley Rogers, and Philip G. Holtzapple* 500
Glutathione biosynthesis in human erythrocytes. I. Identification of the enzymes of glutathione synthesis in hemolysates. *Virginia Minnich, M. B. Smith, M. J. Brauner, and Philip W. Majerus* 507
Effect of saline infusions on intrarenal distribution of glomerular filtrate and proximal reabsorption in the dog. *Henry Mandin, Arnold H. Israelit, Floyd C. Rector, Jr., and Donald W. Seldin* 514
Left ventricular function in acute myocardial infarction. *Paul Hamosh and Jay N. Cohn* 523
Influence of scar on left ventricular performance at the onset of myocardial ischemia: shock versus heart failure. *Timothy J. Regan, Anthony J. Passannante, Mohammad I. Khan, Henry A. Oldewurtel, and Mohan U. Jesrani* 534
Kinetics of RNA synthesis in toad bladder epithelium: action of aldosterone during the latent period. *Pavel Vančura, Geoffrey W. G. Sharp, and Ronald A. Malt* 543
Continuing C3 breakdown after bilateral nephrectomy in patients with membrano-proliferative glomerulonephritis. *Enrique H. Vallota, Judith Forristal, Roger E. Spitzer, Neil C. Davis, and Clark D. West* 552
Incorporation of L-leucine-^{14}C into immunoglobulins by jejunal biopsies of patients with celiac sprue and other gastrointestinal diseases. *P. M. Loeb, W. Strober, Z. M. Falchuk, and L. Laster* 559
Properties of the fragmented sarcoplasmic reticulum from fast twitch and slow twitch muscles. *W. Fiehn and J. B. Peter* 570
Glucose and lipid homeostasis in the absence of human growth hormone. *Thomas J. Merimee, Philip Felig, Errol Marliss, S. Edwin Fineberg, and George F. Cahill, Jr.* 574
Diurnal fluctuations in triglyceride, free fatty acids, and insulin during sucrose consumption and insulin infusion in man. *Philip J. Barter, Kevin F. Carroll, and Paul J. Nestel* 583
Etiology of hyperparathyroidism and bone disease during chronic hemodialysis. I. Association of bone disease with potentially etiologic factors. *Albert E. Fournier, William J. Johnson, Donald R. Taves, John W. Beabout, Claude D. Arnaud, and Ralph S. Goldsmith* 592
Etiology of hyperparathyroidism and bone disease during chronic hemodialysis. II. Factors affecting serum immunoreactive parathyroid hormone. *Albert E. Fournier, Claude D. Arnaud, William J. Johnson, William F. Taylor, and Ralph S. Goldsmith* 599
Complement-derived leukotactic factors in inflammatory synovial fluids of humans. *Peter A. Ward and Nathan J. Zvaifler* 606
Mode of action of parathyroid hormone and cyclic adenosine 3′,5′-monophosphate on renal tubular phosphate reabsorption in the dog. *Zalman S. Agus, Jules B. Puschett, Dorothy Senesky, and Martin Goldberg* 617

Effects of thyroid disease on glucose oxidative metabolism in man. A compartmental model analysis. *David M. Shames, Mones Berman, and Stanton Segal* 627
Glomerular deposition of properdin in acute and chronic glomerulonephritis with hypocomplementemia. *N. Gunnar Westberg, George B. Naff, John T. Boyer, and Alfred F. Michael* 642
Hemoglobin Savannah (B6(24) β-glycine → valine): an unstable variant causing anemia with inclusion bodies. *T. H. J. Huisman, Audrey K. Brown, G. D. Efremov, J. B. Wilson, Cecelia A. Reynolds, R. Uy, and Linda L. Smith* 650
Tension prolongation during recovery from myocardial hypoxia. *Oscar H. L. Bing, John F. Keefe, Michael J. Wolk, Lawrence J. Finkelstein, and Herbert Levine* 660
Renal potassium wasting in renal tubular acidosis (RTA). Its occurrence in types 1 and 2 RTA despite sustained correction of systemic acidosis. *Anthony Sebastian, Elisabeth McSherry, and R. Curtis Morris, Jr* 667
Deposition in and release of vitamin D_3 from body fat: evidence for a storage site in the rat. *Saul J. Rosenstreich, Clayton Rich, and Wade Volwiler* 679
Selective reticulocyte destruction in erythrocyte pyruvate kinase deficiency. *William C. Mentzer, Jr., Robert L. Baehner, Holger Schmidt-Schönbein, Stephen H. Robinson, and David G. Nathan* 688
Regulatory mechanisms of hemoglobin oxygen affinity in acidosis and alkalosis. *A. J. Bellingham, J. C. Detter, and C. Lenfant* 700
Photocatabolism of labeled bilirubin in the congenitally jaundiced (Gunn) rat. *J. Donald Ostrow* 707
Further observations on the folate-binding factor in some leukemic cells. *Sheldon P. Rothenberg and Maria daCosta* 719

Number 4, April 1971

Program of the Sixty-Third Annual Meeting of The American Society for Clinical Investigation, Inc., held in Atlantic City, N. J., 3 May 1971 i
Quantitative immunology of immune hemolytic anemia. I. The fixation of C1 by autoimmune antibody and heterologous anti-IgG antibody. *Wendell F. Rosse* 727
Quantitative immunology of immune hemolytic anemia. II. The relationship of cell-bound antibody to hemolysis and the effect of treatment. *Wendell F. Rosse* 734
The interaction of human macrophages and lymphocytes in the phytohemagglutinin-stimulated production of interferon. *Lois B. Epstein, Martin J. Cline, and Thomas C. Merigan* 744
On the lipoprotein abnormality in type III hyperlipoproteinemia. *Steven Quarfordt, Robert I. Levy, and Donald S. Fredrickson* 754
Quantification of human platelet inositides and the influence of ionic environment on their incorporation of orthophosphate-^{32}P. *Phin Cohen, M. Johan Broekman, Arie Verkley, Johannes W. W. Lisman, and Arie Derksen* 762
Responses of coronary vessels to adrenergic stimuli. *Donald R. McRaven, Allyn L. Mark, Francois M. Abboud, and Howard E. Mayer* 773
Postnatal development of renal function: micropuncture and clearance studies in the dog. *Michael Horster and Heinz Valtin* 779
Intracortical distribution of number and volume of glomeruli during postnatal maturation in the dog. *Michael Horster, Barry J. Kemler, and Heinz Valtin* 796
Evidence for an effect of insulin on the peripheral utilization of ketone bodies in dogs. *E. O. Balasse and R. J. Havel* 801
Muscle and splanchnic glutamine and glutamate metabolism in postabsorptive and starved man. *E. B. Marliss, T. T. Aoki, T. Pozefsky, A. S. Most, and G. F. Cahill, Jr* 814
The rapid induction by phytohemagglutinin of increased α-aminoisobutyric acid uptake by lymphocytes. *John Mendelsohn, Sister Ann Skinner, and Stuart Kornfeld* 818
Pulmonary artery pressure and alveolar gas exchange in man during acclimatization to 12,470 ft. *Richard S. Kronenberg, Peter Safar, Joseph Lee, Fred Wright, William Noble, Eric Wahrenbrock, Robert Hickey, Edwin Nemoto, and John W. Severinghaus* 827
C1r, subunit of the first complement component: purification, properties, and assay based on its linking role. *Maria M. E. de Bracco and R. M. Stroud* 838

Circulating insulin: the proinsulin-like properties of "big" insulin in patients without islet cell tumors. *Barry M. Sherman, Phillip Gorden, Jesse Roth, and Pierre Freychet* ... 849
Human norepinephrine metabolism. Its evaluation by administration of tritiated norepinephrine. *Stanley E. Gitlow, Milton Mendlowitz, Laura M. Bertani, Sherwin Wilk, and Elizabeth K. Wilk* .. 859
Immunological protection against digoxin toxicity. *Donald H. Schmidt and Vincent P. Butler, Jr.* 866
Cholesterol synthesis in the intestine of man: regional differences and control mechanisms. *John M. Dietschy and William G. Gamel* ... 872
Acute undifferentiated human diarrhea in the tropics. I. Alterations in intestinal microflora. *S. L. Gorbach, J. G. Banwell, B. D. Chatterjee, B. Jacobs, and R. B. Sack* ... 881
Acute undifferentiated human diarrhea in the tropics. II. Alterations in intestinal fluid and electrolyte movements. *J. G. Banwell, S. L. Gorbach, N. F. Pierce, R. Mitra, and A. Mondal* ... 890
Renal handling of low molecular weight proteins. I. L-Chain metabolism in experimental renal disease. *R. Peter Mogielnicki, Thomas A. Waldmann, and Warren Strober* ... 901
Ventilatory mechanics and expiratory flow limitation during exercise in patients with obstructive lung disease. *William A. Potter, Snorri Olafsson, and Robert E. Hyatt* ... 910
Cyclic 3′,5′-adenosine monophosphate in the human leukocyte: synthesis, degradation, and effects on neutrophil candidacidal activity. *Henry R. Bourne, Robert I. Lehrer, Martin J. Cline, and Kenneth L. Melmon* ... 920
Skin capillary blood flow in scleroderma. *E. Carwile LeRoy, John A. Downey, and Paul J. Cannon* .. 930
The effect of administration of human growth hormone on the plasma growth hormone, cortisol, glucose, and free fatty acid response to insulin: evidence for growth hormone autoregulation in man. *Robert L. Abrams, Melvin M. Grumbach, and Selna L. Kaplan* ... 940
Hypogammaglobulinemia associated with accelerated catabolism of IgG secondary to the interaction with an IgG-reactive monoclonal IgM. *Thomas A. Waldmann, John S. Johnson, and Norman Talal* 951

Number 5, May 1971

Inorganic pyrophosphate in plasma in normal persons and in patients with hypophosphatasia, osteogenesis imperfecta, and other disorders of bone. *R. G. G. Russell, S. Bisaz, A. Donath, D. B. Morgan, and H. Fleisch* ... 961
Relationship between renin and intrarenal hemodynamics in hemorrhagic hypotension. *A. Grandchamp, R. Veyrat, E. Rosset, J. R. Scherrer, and B. Truniger* ... 970
Neuraminidase activity in bacterial meningitis. *Richard D. O'Toole, Louise Goode, and Calderon Howe* 979
The metabolism of circulating maltose in man. *Sister John M. Young and Elliot Weser* ... 986
Relative effects of pregnancy, estradiol, and progesterone on plasma insulin and pancreatic islet insulin secretion. *N. V. Costrini and R. K. Kalkhoff* ... 992
Placental transport of vitamin B_{12} in the pregnant rat. *Stanley E. Graber, Ursula Scheffel, Barbara Hodkinson, and Patricia A. McIntyre* ... 1000
Experimental obesity in man: cellular character of the adipose tissue. *Lester B. Salans, Edward S. Horton, and Ethan A. H. Sims* ... 1005
Activation of myocardial adenyl cyclase by histamine in guinea pig, cat, and human heart. *Irwin Klein and Gerald S. Levey* ... 1012
Activation energy for water diffusion across the toad bladder: evidence against the pore enlargement hypothesis. *Richard M. Hays, Nicholas Franki, and Roy Soberman* ... 1016
Excitation-contraction coupling in heart. VII. Calcium accumulation in subcellular particles in congestive heart failure. *Prakash V. Sulakhe and Naranjan S. Dhalla* ... 1019
The pulmonary vasopressor response to decreases in blood pH in intact dogs. *Albert L. Hyman, William C. Woolverton, Paul S. Guth, and Herbert Ichinose* ... 1028
Mediators of histamine release from human platelets, lymphocytes, and granulocytes. *Michael T. Kelly, R. Russell Martin, and Arthur White* ... 1044
Studies on the coordinate activity and lability of orotidylate phosphoribosyltransferase and decarboxylase in human erythrocytes, and the effects of allopurinol administration. *Richard M. Fox, Margaret H. Wood, and William J. O'Sullivan* ... 1050
On the adaptation in potassium excretion associated with nephron reduction in the dog. *Raymond G. Schultze, Dennis D. Taggart, Howard Shapiro, J. Phillip Pennell, Sali Caglar, and Neal S. Bricker* 1061

Effect of adrenergic-blocking or -stimulating agents on plasma growth hormone, immunoreactive insulin, and blood free fatty acid levels in man. *Hiroo Imura, Yuzuru Kato, Masaki Ikeda, Masachika Morimoto, and Mikio Yawata* ... 1069
Immunological responses to L-asparaginase. *Robert G. Peterson, Robert E. Handschumacher, and Malcolm S. Mitchell* ... 1080
The effects of the morphine analogue levorphanol on leukocytes. Metabolic effects at rest and during phagocytosis. *Nancy Wurster, Peter Elsbach, Eric J. Simon, Penelope Pettis, and Sharon Lebow* ... 1091
Vitamin B_{12} uptake by intestinal microorganisms: mechanism and relevance to syndromes of intestinal bacterial overgrowth. *R. A. Giannella, S. A. Broitman, and N. Zamcheck* ... 1100
NB1, a new neutrophil-specific antigen involved in the pathogenesis of neonatal neutropenia. *Parviz Lalezari, Georgette B. Murphy, and Fred H. Allen, Jr.* ... 1108
Importance of the carotid sinus baroreceptors in the regulation of myocardial performance. *Gerald Glick* 1116
Quantitation of extrathyroidal conversion of L-thyroxine to 3,5,3′-triiodo-L-thyronine in the rat. *Harold L. Schwartz, Martin I. Surks, and Jack H. Oppenheimer* ... 1124
Plasma lipoproteins in familial lecithin:cholesterol acyltransferase deficiency: physical and chemical studies of low and high density lipoproteins. *Kaare R. Norum, John A. Glomset, Alex V. Nichols, and Trudy Forte* ... 1131
Plasma lipoproteins in familial lecithin:cholesterol acyltransferase deficiency: structure of low and high density lipoproteins as revealed by electron microscopy. *Trudy Forte, Kaare R. Norum, John A. Glomset, and Alex V. Nichols* ... 1141
The effect of ovariectomy on gonadotropin release. *S. S. C. Yen and C. C. Tsai* ... 1149
The postobstructive kidney. Observations on nephron function after the relief of 24 hr of ureteral ligation in the dog. *D. Danny Bercovitch, Leonard Kasen, Laurence Blann, and Marvin F. Levitt* ... 1154

NUMBER 6, JUNE 1971

A physiological approach to the assessment of disease activity in rheumatoid arthritis. *E. J. Goetzl, K. H. Falchuk, L. S. Zeiger, A. L. Sullivan, C. L. Hebert, J. P. Adams, and J. L. Decker* ... 1167
Redox state of free nicotinamide-adenine nucleotides in the cytoplasm and mitochondria of alveolar macrophages. *Sheldon Mintz and Eugene D. Robin* ... 1181
The extrathyroidal conversion rate of thyroxine to triiodothyronine in normal man. *Constance S. Pittman, Joseph B. Chambers, Jr., and Virginia H. Read* ... 1187
Changing types of nephritogenic streptococci in Trinidad. *Elizabeth V. Potter, Jesse S. Ortiz, A. Richey Sharrett, Emma G. Burt, Juanita P. Bray, John F. Finklea, Theo Poon-King, and David P. Earle* ... 1197
The effect of epsilon amino caproic acid and other inhibitors of proteolysis upon the response of human peripheral blood lymphocytes to phytohemagglutinin. *Rochelle Hirschhorn, Judith Grossman, Walter Troll, and Gerald Weissmann* ... 1206
Stimulation of intestinal mucosal adenyl cyclase by cholera enterotoxin and prostaglandins. *Daniel V. Kimberg, Michael Field, Judith Johnson, Antonia Henderson, and Elaine Gershon* ... 1218
Renal effects of adenosine 3′,5′-cyclic monophosphate and dibutyryl adenosine 3′,5′-cyclic monophosphate. Evidence for a role for adenosine 3′,5′-cyclic monophosphate in the regulation of proximal tubular sodium reabsorption. *John R. Gill, Jr., and Alfred G. T. Casper* ... 1231
Role of gastrin supersensitivity in the pathogenesis of lower esophageal sphincter hypertension in achalasia. *Sidney Cohen, William Lipshutz, and William Hughes* ... 1241
Inhibition of antibodies binding polyinosinic·polycytidylic acid in human and mouse lupus sera by viral and synthetic ribonucleic acids. *Norman Talal, Alfred D. Steinberg, and Gerald G. Daley* ... 1248
Genetic diversity of the "Mediterranean" glucose-6-phosphate dehydrogenase deficiency phenotype. *George Stamatoyannopoulos, Volker Voigtlander, Panayotis Kotsakis, and Angelos Akrivakis* ... 1253
Defective cellular immunity in renal failure: depression of reactivity of lymphocytes to phytohemagglutinin by renal failure serum. *W. Marcus Newberry and Jay P. Sanford* ... 1262
Marrow grafts between canine siblings matched by serotyping and mixed leukocyte culture. *Rainer Storb, Robert H. Rudolph, and E. Donnall Thomas* ... 1272
Estimation of V_{max} in auxotonic systoles from the rate of relative increase of isovolumic pressure: (dP/dt)kP. *Michael J. Wolk, John F. Keefe, Oscar H. L. Bing, Lawrence J. Finkelstein, and Herbert J. Levine* ... 1276

Fetal bile salt metabolism. I. The metabolism of sodium cholate-^{14}C in the fetal dog. *B. T. Jackson, R. A. Smallwood, G. J. Piasecki, A. S. Brown, H. F. J. Rauschecker, and R. Lester* 1286
Abnormal hormone responses of an adrenocortical cancer adenyl cyclase. *Immanuel Schorr and Robert L. Ney* 1295
Transport characteristics of folates in cerebrospinal fluid; a study utilizing doubly labeled 5-methyltetrahydrofolate and 5-formyltetrahydrofolate. *M. Levitt, P. F. Nixon, J. H. Pincus, and J. R. Bertino* 1301
Effect of cortisone treatment on the active transport of calcium by the small intestine. *Daniel V. Kimberg, Richard D. Baerg, Elaine Gershon, and Ruta T. Graudusius* 1309
Modification of the cardiovascular effects of L-dopa by decarboxylase inhibitors. *August M. Watanabe, Leon C. Parks, and Irwin J. Kopin* 1322
The distribution of sodium-potassium–activated adenosine triphosphatase in medulla and cortex of the kidney. *Ernesto D. Hendler, Jorge Torretti, and Franklin H. Epstein* 1329
The metabolic clearance rate and origin of plasma dihydrotesterone in man and its conversion to the 5α-androstanediols. *Jacques A. Mahoudeau, C. Wayne Bardin, and Mortimer B. Lipsett* 1338
Alterations in thyroid hormone economy in patients with hydatidiform mole. *Valerie Anne Galton, Sidney H. Ingbar, Jesus Jimenez-Fonseca, and Jerome M. Hershman* 1345
A biochemical and morphologic study of very low density lipoproteins in carbohydrate-induced hypertriglyceridemia. *Neil B. Ruderman, Albert L. Jones, Ronald M. Krauss, and Eleazar Shafrir* 1355

PROCEEDINGS OF THE ANNUAL MEETING OF THE AMERICAN SOCIETY FOR CLINICAL INVESTIGATION, INC., ATLANTIC CITY 1971

Presidential Address 1369
Abstracts, with Author Index 1a

NUMBER 7, JULY 1971

Red cell aging in vivo. *A. M. Ganzoni, R. Oakes, and R. S. Hillman* 1373
Accelerated reabsorption in the proximal tubule produced by volume depletion. *Michael W. Weiner, Edward J. Weinman, Michael Kashgarian, and John P. Hayslett* 1379
Effect of free fatty acids on myocardial function and oxygen consumption in intact dogs. *Ole D. Mjøs* 1386
The human alveolar macrophage: isolation, cultivation in vitro, and studies of morphologic and functional characteristics. *Allen B. Cohen and Martin J. Cline* 1390
The effect of insulin upon glucose metabolism by adipose cells of different size. Influence of cell lipid and protein content, age, and nutritional state. *Lester B. Salans and James W. Dougherty* 1399
Deposition and clearance of 2 μ particles in the tracheobronchial tree of normal subjects—smokers and nonsmokers. *Ruy V. Lourenço, Mary F. Klimek, and Claudia J. Borowski* 1411
The potential use of xylitol in glucose-6-phosphate dehydrogenase deficiency anemia. *Y. M. Wang, J. H. Patterson, and J. van Eys* 1421
Effect of renal vasodilatation on the distribution of cortical blood flow in the kidney of the dog. *Jay H. Stein, Thomas F. Ferris, James E. Huprich, Timothy C. Smith, and Richard W. Osgood* 1429
Effect of lipids on growth hormone secretion in humans. *William G. Blackard, Edgar W. Hull, and Alfredo Lopez-S* 1439
Diazoxide effects on biphasic insulin release: "adrenergic" suppression and enhancement in the perifused rat pancreas. *Ian M. Burr, Errol B. Marliss, Werner Stauffacher, and Albert E. Renold* 1444
Alteration in the rheologic properties of *Plasmodium knowlesi*–infected red cells. A possible mechanism for capillary obstruction. *Louis H. Miller, Shunichi Usami, and Shu Chien* 1451
Mechanical properties of the esophageal wall. *Raj K. Goyal, Piero Biancani, Aris Phillips, and Howard M. Spiro* 1456
Measurement of cardiac output in man with a nonrecirculating indicator. *Stephen M. Wittenberg, Francis J. Klocke, David G. Greene, Ivan L. Bunnell, Herman L. Falsetti, and Joseph A. Zizzi* 1466
Lysozyme turnover in the rat. *Niels Ebbe Hansen, Hans Karle, and Vagn Andersen* 1473
Role of antidiuretic hormone in the abnormal water diuresis of anterior hypopituitarism in man. *Zalman S. Agus and Martin Goldberg* 1478

The plasma estradiol as an index of fetoplacental function. *Dan Tulchinsky and Stanley G. Korenman* 1490
Micropuncture studies of proximal tubule albumin concentrations in normal and nephrotic rats. *Donald E. Oken and Walter Flamenbaum* 1498
The effect of fibrin-stabilizing factor on the subunit structure of human fibrin. *Martin L. Schwartz, Salvatore V. Pizzo, Robert L. Hill, and Patrick A. McKee* 1506
Studies of human sera with cytotoxic activity. *Ralph C. Williams, Jr., Jean D. Emmons, and Edmond J. Yunis* 1514
Glomerular basement membrane–reactive antibody in anti-lymphocyte globulin. *Curtis B. Wilson, Frank J. Dixon, Joseph G. Fortner, and G. James Cerilli* 1525
Human forearm metabolism during progressive starvation. *O. E. Owen and George A. Reichard, Jr.* 1536

CONCISE PUBLICATIONS

Ventricular arrhythmias induced in monkeys by the inhalation of aerosol propellants. *George J. Taylor IV, Willard S. Harris, and Morton D. Bogdonoff* 1546
Dose-response relationship of luteinizing hormone to luteinizing hormone–releasing hormone in man. *Abba J. Kastin, Andrew V. Schally, Carlos Gual, A. Rees Midgley, Jr., M. Clinton Miller III, and Angela Cabeza* 1551
Oxygen equilibrium of hemoglobin J Cape Town. *Samuel Charache and Trefor Jenkins* 1554

NUMBER 8, AUGUST 1971

Human prolactin: measurement in plasma by in vitro bioassay. *David L. Kleinberg and Andrew G. Frantz* 1557
Colonic secretion of water and electrolytes induced by bile acids: perfusion studies in man. *Hagop S. Mekhjian, Sidney F. Phillips, and Alan F. Hofmann* 1569
Effects of nitroglycerin on regional myocardial blood flow in coronary artery disease. *Lawrence D. Horwitz, Richard Gorlin, Warren J. Taylor, and Harvey G. Kemp* 1578
The regulation of aldosterone secretion in anephric man. *Francis Bayard, C. Robert Cooke, David J. Tiller, Inese Z. Beitins, Avinoam Kowarski, W. Gordon Walker, and Claude J. Migeon* 1585
On the mechanism of inhibition in fluid reabsorption by the renal proximal tubule of the volume-expanded rat. *Barry M. Brenner, Julia L. Troy, and Terrance M. Daugharty* 1596
Evidence for a humoral mechanism in volume expansion natriuresis. *George J. Kaloyanides and Maher Azer* 1603
Effects of Ca^{++} and prostaglandin E_1 on vasopressin activation of renal adenyl cyclase. *Fumiaki Marumo and Isidore S. Edelman* 1613
The source of plasma dihydrotestosterone in man. *T. Ito and R. Horton* 1621
An unusual hemoglobin anomaly and its relation to α-thalassemia and hemoglobin-H disease. *G. D. Efremov, Ruth N. Wrightstone, T. H. J. Huisman, W. A. Schroeder, Carol Hyman, Jorge Ortega, and Kenneth Williams* 1628
Glutathione synthesis in human erythrocytes. II. Purification and properties of the enzymes of glutathione biosynthesis. *Philip W. Majerus, M. J. Brauner, M. B. Smith, and Virginia Minnich* 1637
Effects of norethandrolone on the transport and peripheral metabolism of thyroxine in patients lacking thyroxine-binding globulin. Observations on the physiological role of thyroxine-binding prealbumin. *Lewis E. Braverman, Theodore AvRuskin, Michael J. Cullen, Apostolos G. Vagenakis, and Sidney H. Ingbar* 1644
The glycogenolytic activity of immunoreactive pancreatic glucagon in plasma. *Jose Marco, Gerald R. Faloona, and Roger H. Unger* 1650
Left ventricular performance and coronary flow after coronary embolization with plastic microspheres. *R. G. Monroe, C. G. LaFarge, W. J. Gamble, A. E. Kumar, and F. J. Manasek* 1656
The protein and lipid composition of arterial elastin and its relationship to lipid accumulation in the atherosclerotic plaque. *Dieter M. Kramsch, Carl Franzblau, and William Hollander* 1666
Leukokinetic studies. XIV. Blood neutrophil kinetics in chronic, steady-state neutropenia. *C. R. Bishop, G. Rothstein, H. E. Ashenbrucker, and J. W. Athens* 1678

Metabolism of fibrinogen in cirrhosis of the liver. *G. N. Tytgat, D. Collen, and M. Verstraete* 1690
Influence of endogenous insulin secretion on splanchnic glucose and amino acid metabolism in man. *Philip Felig and John Wahren* 1702
The glycosaminoglycans of normal and arthritic cartilage. *Henry J. Mankin and Louis Lippiello* 1712
Bile acid synthesis in the isolated, perfused rabbit liver. *E. H. Mosbach, M. A. Rothschild, I. Bekersky, M. Oratz, and J. Mongelli* 1720
Energy metabolism in human erythrocytes. I. Effects of sodium fluoride. *Stephen A. Feig, Stephen B. Shohet, and David G. Nathan* 1731
Reversal of digoxin toxicity with specific antibodies. *Donald H. Schmidt and Vincent P. Butler, Jr.* 1738
Isolation and properties of phagocytic vesicles from polymorphonuclear leukocytes. *Thomas P. Stossel, Thomas D. Pollard, Robert J. Mason, and Martha Vaughan* 1745
Preparation and properties of thyroxine-binding alpha globulin (TBG). *Kenneth Sterling, Satoshi Hamada, Yoshihiro Takemura, Milton A. Brenner, Edward S. Newman, and Mitsuo Inada* 1758

CONCISE PUBLICATIONS

Ligand kinetics in hemoglobin Hiroshima. *Ronald L. Nagel, Quentin H. Gibson, and Howard B. Hamilton* 1772
The dynamics of glomerular ultrafiltration in the rat. *Barry M. Brenner, Julia L. Troy, and Terrance M. Daugharty* 1776

NUMBER 9, SEPTEMBER 1971

The effect of ketone bodies on renal ammoniogenesis. *Guy Lemieux, Patrick Vinay, Pierre Robitaille, Gérard E. Plante, Yolande Lussier, and Pierre Martin* 1781
Direct measurement of proinsulin in human plasma by the use of an insulin-degrading enzyme. *Abbas E. Kitabchi, William C. Duckworth, James S. Brush, and Martha Heinemann* 1792
Abnormal membrane protein of red blood cells in hereditary spherocytosis. *H. S. Jacob, A. Ruby, E. S. Overland, and D. Mazia* 1800
Normalization of growth hormone hyperresponse to exercise in juvenile diabetics after "normalization" of blood sugar. *Aage Prange Hansen* 1806
Alcohol-induced depression of albumin synthesis: reversal by tryptophan. *Marcus A. Rothschild, Murray Oratz, Joseph Mongelli, and Sidney S. Schreiber* 1812
Fibrinogen Bethesda: a congenital dysfibrinogenemia with delayed fibrinopeptide release. *H. R. Gralnick, H. M. Givelber, J. R. Shainoff, and J. S. Finlayson* 1819
Quantitative studies of the metabolism of chylomicron triglycerides and cholesterol by liver and extrahepatic tissues of sheep and dogs. *E. N. Bergman, R. J. Havel, B. M. Wolfe, and T. Bøhmer* .. 1831
The significance of erythrocyte antigen site density. II. Hemolysis. *Leon W. Hoyer and Norma C. Trabold* 1840
Preferential hemolysis of immature erythrocytes in experimental iron deficiency anemia: source of erythropoietic bilirubin formation. *Stephen H. Robinson and Ellen Koeppel* 1847
Biochemical and biophysical aspects of human platelet adhesion to collagen fibers. *Bruce Lyman, Lawrence Rosenberg, and Simon Karpatkin* 1854
Specific removal of in vivo antibody by extracorporeal circulation over an immunoadsorbent in gel. *Isaac Schenkein, Jean-Claude Bystryn, and Jonathan W. Uhr* 1864
Effect of inhibition of lipolysis on myocardial oxygen consumption in the presence of isoproterenol. *Ole Danbolt Mjøs* 1869
Functional evaluation of an inherted abnormal fibrinogen: fibrinogen "Baltimore." *Eugene A. Beck, John R. Shainoff, Alfred Vogel, and Dudley P. Jackson* 1874
The effects of intra-aortic counterpulsation on cardiac performance and metabolism in shock associated with acute myocardial infarction. *Hiltrud Mueller, Stephen M. Ayers, E. Foster Conklin, Stanley Giannelli, Jr., James T. Mazzara, William T. Grace, and Thomas F. Nealon, Jr.* 1885
Conversion of vitamin B_6 compounds to active forms in the red blood cell. *Barbara B. Anderson, Catherine E. Fulford-Jones, J. Anthony Child, Michael E. J. Beard, and Christopher J. T. Bateman* 1901
Intestinal folate absorption. I. 5-Methyltetrahydrofolic acid. *Williamson Strum, Peter F. Nixon, Joseph B. Bertino, and Henry J. Binder* 1910

Biliary lipid secretion and bile composition after acute and chronic interruption of the enterohepatic circulation in the rhesus monkey. IV. Primate biliary physiology. *R. Hermon Dowling, Eberhard Mack, and Donald M. Small* 1917
The clinical and metabolic effects of porcine calcitonin on Paget's disease of bone. *Florence Shai, Richard K. Baker, and Stanley Wallach* 1927
Observations on the responsiveness of human subjects to human growth hormone. Effects of endogenous growth hormone deficiency and myotonic dystrophy. *Daniel Rudman, Samuel B. Chyatte, Joseph H. Patterson, Glynda G. Gerron, Irma O'Beirne, Joan Barlow, Peter Ahmann, Ashby Jordan, and Robert C. Mosteller* 1941
The peripheral vascular response to severe exercise in untethered dogs before and after complete heart block. *Stephen F. Vatner, Charles B. Higgins, Saxon White, Thomas Patrick, and Dean Franklin* .. 1950
Biochemical and genetic studies in cystinuria: observations on double heterozygotes of genotype I/II. *Claude L. Morin, Margaret W. Thompson, Sanford H. Jackson, and Andrew Sass-Kortsak* 1961
Diphenylhydantoin and potassium transport in isolated nerve terminals. *Antonio V. Escueta and Stanley H. Appel* 1977
Amino acid oxidase of leukocytes in relation to H_2O_2-mediated bacterial killing. *Marlene R. Eckstein, Robert L. Baehner, and David G. Nathan* 1985
The effect of experimental insulin deficiency on glucagon secretion. *Walter A. Müller, Gerald R. Faloona, and Roger H. Unger* 1992

CONCISE PUBLICATIONS

Progeria: a cell culture study on aging. *B. Shannon Danes* 2000
Stimulation of granulocytopoiesis by a diffusable factor in vivo. *G. Rothstein, E. H. Hügl, C. R. Bishop, J. W. Athens, and H. E. Ashenbrucker* 2004

NUMBER 10, OCTOBER 1971

Studies on the absorption and metabolism of folic acid. I. Folate absorption in the dog after exposure of isolated intestinal segments to synthetic pteroylpolyglutamates of various chain lengths. *C. M. Baugh, C. L. Krumdieck, H. J. Baker, and C. E. Butterworth, Jr.* 2009
Relationship between plasma sodium concentration and vascular reactivity in man. *Donald D. Heistad, Francois M. Abboud, and Dennis R. Ballard* 2022
Radioimmunoassay for measurement of triiodothyronine in human serum. *Inder J. Chopra, David H. Solomon, and Gildon N. Beall* 2033
Inducible heme oxygenase in the kidney: a model for the homeostatic control of hemoglobin catabolism. *Neville R. Pimstone, Peter Engel, Raimo Tenhunen, Paul T. Seitz, Harvey S. Marver, and Rudi Schmid* 2042
The formation and metabolism of 3α,7α-dihydroxy-5β-cholestan-26-oic acid in man. *Russell F. Hanson* 2051
Studies on purified rheumatoid synovial collagenase in vitro and in vivo. *Eugene A. Bauer, Arthur Z. Eisen, and John J. Jeffrey* 2056
Synthesis and transport of lipoprotein particles by intestinal absorptive cells in man. *Guido N. Tytgat, Cyrus E. Rubin, and David R. Saunders* 2065
Immunologic differentiation of primary hyperparathyroidism from hyperparathyroidism due to nonparathyroid cancer. *B. Lawrence Riggs, Claude D. Arnaud, James C. Reynolds, and Lynwood H. Smith* 2079
Separation of plasma thromboplastin antecedent from kallikrein by the plasma α_2-macroglobulin, kallikrein inhibitor. *Peter C. Harpel* 2084
Cable parameters, sodium, potassium, chloride, and water content, and potassium efflux in isolated external intercostal muscle of normal volunteers and patients with myotonia congenita. *R. J. Lipicky, S. H. Bryant, and J. H. Salmon* 2091
Metabolic alterations in the human erythrocyte produced by increases in glucose concentration. The role of the polyol pathway. *Susan F. Travis, Anthony D. Morrison, Rex S. Clements, Jr., Albert I. Winegrad, and Frank A. Oski* 2104

Proinsulin-like component of circulating insulin in the basal state and in patients and hamsters with islet cell tumors. *Phillip Gorden, Barry Sherman, and Jesse Roth* ... 2113
Secretion of glucagon from the isolated, perfused canine pancreas. *Johan Iversen* ... 2123
Serum alkaline phosphatase in hypophosphatasia. *Joseph B. Warshaw, John W. Littlefield, William H. Fishman, Norma R. Inglis, and Leo L. Stolbach* ... 2137
Genetically determined heterogeneity of the C1 esterase inhibitor in patients with hereditary angioneurotic edema. *Fred S. Rosen, Chester A. Alper, Jack Pensky, Martin R. Klemperer, and Virginia H. Donaldson* ... 2143
Proximal tubular function in dogs with thoracic caval constriction. *R. Brewer Auld, Edward A. Alexander, and Norman G. Levinsky* ... 2150
The turnover and transport of vitamin D and of a polar metabolite with the properties of 25-hydroxycholecalciferol in human plasma. *John Edgar Smith and DeWitt S. Goodman* ... 2159
Inhibition of collagen-induced platelet aggregation by normal plasma. *H. L. Nossel, G. D. Wilner, and M. Drillings* ... 2168
Performance of the right ventricle under stress: relation to right coronary flow. *Harold Brooks, Edward S. Kirk, Pantel S. Vokonas, Charles W. Urschel, and Edmund H. Sonnenblick* ... 2176
A decreased metabolic clearance rate of aldosterone in benign essential hypertension. *W. Nowaczynski, O. Kuchel, and J. Genest* ... 2184
The relative contributions of reabsorptive rate and redistributed nephron filtration rate to changes in proximal tubular fractional reabsorption during acute saline infusion and aortic constriction in the rat. *Ettore Bartoli and Laurence E. Earley* ... 2191
Synchronization and recruitment in acute leukemia. *Beatrice C. Lampkin, Takeshi Nagao, and Alvin M. Mauer* ... 2204
The effect of alanine on glucagon secretion. *Walter A. Müller, Gerald R. Faloona, and Roger H. Unger* 2215
Effect of thyrotropin-releasing factor on serum thyroid-stimulating hormone. An approach to distinguishing hypothalamic from pituitary forms of idiopathic hypopituitary dwarfism. *Bruce H. Costom, Melvin M. Grumbach, and Selna L. Kaplan* ... 2219

CONCISE PUBLICATIONS

Hydrogen peroxide utilization in myeloperoxidase-deficient leukocytes: a possible microbicidal control mechanism. *Seymour J. Klebanoff and Stephanie H. Pincus* ... 2226
Effective glomerular filtration pressure and single nephron filtration rate during hydropenia, elevated ureteral pressure, and acute volume expansion with isotonic saline. *Vittorio E. Andreucci, Jaime Herrera-Acosta, Floyd C. Rector, Jr., and Donald W. Seldin* ... 2230

NUMBER 11, NOVEMBER 1971

Detection of intravascular coagulation. *C. Thomas Kisker and Ruth Rush* ... 2235
Studies of Y and Z, two hepatic cytoplasmic organic anion–binding proteins: effect of drugs, chemicals, hormones, and cholestasis. *Humberto Reyes, A. Jonathan Levi, Zenaida Gatmaitan, and Irwin M. Arias* ... 2242
Abnormal membrane sodium transport in Liddle's syndrome. *Jerry D. Gardner, Allen Lapey, Artemis P. Simopoulos, and Emmanuel L. Bravo* ... 2253
The measurement of the synthetic rate of bilirubin from hepatic hemes in patients with acute intermittent porphyria. *E. A. Jones, J. R. Bloomer, and N. I. Berlin* ... 2259
Intestinal transport of dipeptides in man: relative importance of hydrolysis and intact absorption. *Siamak A. Adibi* ... 2266
The inhibition by methylmalonic acid of malate transport by the dicarboxylate carrier in rat liver mitochondria. A possible explanation for hypoglycemia in methylmalonic aciduria. *M. L. Halperin, C. M. Schiller, and I. B. Fritz* ... 2276
The effects of posture and isoproterenol on the velocity of left ventricular contraction in man. The reciprocal relationship between left ventricular volume and myocardial wall force during ejection on mean rate of circumferential shortening. *H. W. Paley, Ian G. McDonald, Joseph Blumenthal, and James Mailhot* ... 2283

Relationship of nervous tissue transketolase to the neuropathy in chronic uremia. *R. B. Sterzel, M. Semar, E. T. Lonergan, G. Treser, and K. Lange* 2295
Cholestasis induced by sodium taurolithocholate in isolated hamster liver. *John E. King and Leslie J. Schoenfield* 2305
Transport and metabolism of sarcosine in hypersarcosinemic and normal phenotypes. *Francis H. Glorieux, Charles R. Scriver, Edgard Delvin, and Fazl Mohyuddin* 2313
Adaptation of muscle to exercise. Increase in levels of palmityl CoA synthetase, carnitine palmityltransferase, and palmityl CoA dehydrogenase, and in the capacity to oxidize fatty acids. *P. A. Molé, L. B. Oscai, and J. O. Holloszy* 2323
Hypercatabolism of IgG, IgA, IgM, and albumin in the Wiskott-Aldrich syndrome. A unique disorder of serum protein metabolism. *R. Michael Blaese, Warren Strober, Arthur L. Levy, and Thomas A. Waldmann* 2331
Inhibition of hepatic triglyceride formation by clofibrate. *Larry L. Adams, William W. Webb, and Harold J. Fallon* 2339
Renal handling of phosphorus in oliguric and nonoliguric mercury-induced acute renal failure in rats. *Mordecai M. Popovtzer, Shaul G. Massry, Mario Villamil, and Charles R. Kleeman* 2347
The mechanism of decreased intestinal sodium and water absorption after acute volume expansion in the rat. *Michael H. Humphreys and Laurence E. Earley* 2355
Immunoglobulins on the surface of lymphocytes. IV. Distribution in hypogammaglobulinemia, cellular immune deficiency, and chronic lymphatic leukemia. *Howard M. Grey, Enrique Rabellino, and Bernard Pirofsky* 2368
The separation of alpha-2 macroglobulin into five components with differing electrophoretic and enzyme-binding properties. *Russell Saunders, Barbara J. Dyce, Wilton E. Vannier, and Bernard J. Haverback* 2376
Competitive nature of the intestinal transport mechanism for cobalt and iron in the rat. *A. B. R. Thomson, L. S. Valberg, and D. G. Sinclair* 2384
Hemoglobin Louisville (β42 (CDl) Phe → Leu): an unstable variant causing mild hemolytic anemia. *Marie M. Keeling, Lynn L. Ogden, Ruth N. Wrightstone, J. B. Wilson, Cecelia A. Reynolds, Janice L. Kitchens, and T. H. J. Huisman* 2395
Regional lung function in patients with hepatic cirrhosis. *F. Ruff, J. M. B. Hughes, N. Stanley, D. McCarthy, R. Greene, A. Aronoff, L. Clayton, and J. Milic-Emili* 2403
Effect of extracellular fluid volume expansion on maximum glucose reabsorption rate and glomerular tubular balance in single rat nephrons. *Andrew D. Baines* 2414
The effects of diseases of the liver, thyroid, and kidneys on the transport of vitamin A in human plasma. *Frank Rees Smith and DeWitt S. Goodman* 2426
Influence of antidiuretic hormone on peritoneal membrane area and permeability. *Lee W. Henderson and James E. Kintzel* 2437
A micropuncture study of collecting tubule function in rats with hereditary diabetes insipidus. *Rex L. Jamison, John Buerkert, and Frank Lacy* 2445

CONCISE PUBLICATIONS

Epinephrine: selective inhibition of the acute insulin response to glucose. *Roger L. Lerner and Daniel Porte, Jr.* 2453
Isolation and translation of hemoglobin messenger RNA from thalassemia, sickle cell anemia, and normal human reticulocytes. *Arthur W. Nienhuis and W. French Anderson* 2458

NUMBER 12, DECEMBER 1971

Effects of vasopressin and prostaglandin E_1 on the adenyl cyclase–cyclic 3′,5′-adenosine monophosphate system of the renal medulla of the rat. *Nama P. Beck, Toshio Kaneko, Uriel Zor, James B. Field, and Bernard B. Davis* 2461
Oxidant injury of Caucasian glucose-6-phosphate dehydrogenase–deficient red blood cells by phagocytosing leukocytes during infection. *Robert L. Baehner, David G. Nathan, and William B. Castle* .. 2466
Effects of 3-nitro-L-tyrosine on thyroid function in the rat: an experimental model for the dehalogenase defect. *William L. Green* 2474

Defective control of ribosomal RNA processing in stimulated leukemic lymphocytes. *Arnold D. Rubin* 2485
Inhibition by sulfonamides of the candidacidal activity of human neutrophils. *Robert I. Lehrer* 2498
The effect of supplemental oral phosphate on the bone mineral changes during prolonged bed rest. *Stephen B. Hulley, John M. Vogel, Charles L. Donaldson, Jon H. Bayers, Ronald J. Friedman, and Sheldon N. Rosen* 2506
Formation, mineralization, and resorption of bone in hypophosphatemic rats. *D. Baylink, J. Wergedal, and M. Stauffer* 2519
Fecal excretion of bile acids: a new technique for studying bile acid kinetics in patients with ileal resection. *James F. Woodbury and Fred Kern, Jr.* 2531
Chemotaxis of polymorphonuclear leukocytes from patients with rheumatoid arthritis. *Alastair G. Mowat and John Baum* 2541
Sites of pulmonary vasomotor reactivity in the dog during alveolar hypoxia and serotonin and histamine infusion. *Jon B. Glazier and John F. Murray* 2550
Immunologic responses to bacteriophage ϕX 174 in immunodeficiency diseases. *Hans D. Ochs, Starkey D. Davis, and Ralph J. Wedgwood* 2559
Intestinal transport of water and electrolytes during extracellular volume expansion in dogs. *James T. Higgins, Jr., and Norman P. Blair* 2569
Studies on antibiotic synergism against enterococci. II. Effect of various antibiotics on the uptake of ^{14}C-labeled streptomycin by enterococci. *Robert C. Moellering, Jr. and Arnold N. Weinberg* 2580
Effects of cardiac depression and of anesthesia on the myocardial action of a cardiac glycoside. *Stephen F. Vatner, Charles B. Higgins, Thomas Patrick, Dean Franklin, and Eugene Braunwald* 2585
Plasma insulin disturbances in primary hyperparathyroidism. *Hakjoong Kim, Ronald K. Kalkhoff, Nicholas V. Costrini, James M. Cerletty, and Mitchell Jacobson* 2596
Bilirubin excretion in rats with normal and impaired bilirubin conjugation: effect of phenobarbital. *Stephen H. Robinson, Claudine Yannoni, and Susumu Nagasawa* 2606
Quantitative assessment of the extent of myocardial infarction in the conscious dog by means of analysis of serial changes in serum creatine phosphokinase activity. *William E. Shell, John K. Kjekshus, and Burton E. Sobel* 2614
Interruption of the enterohepatic circulation of digitoxin by cholestyramine. I. Protection against lethal digitoxin intoxication. *James H. Caldwell and Norton J. Greenberger* 2626
Interruption of the enterohepatic circulation of digitoxin by cholestyramine. II. Effect on metabolic disposition of tritium-labeled digitoxin and cardiac systolic intervals in man. *James H. Caldwell, Charles A. Bush, and Norton J. Greenberger* 2638
Defective granulocyte chemotaxis in the Chediak-Higashi syndrome. *Robert A. Clark and Harry R. Kimball* 2645
Pressure-flow studies in man: effect of atrial systole on ventricular function in mitral stenosis. *M. Eugene Kendall, Abe Walston II, Frederick R. Cobb, and Joseph C. Greenfield, Jr.* 2653
Studies of the secretion of monkey placental lactogen. *C. Belanger, B. Shome, H. Friesen, and R. E. Myers* 2660
Pathogenesis of hypocalcemia in magnesium depletion. Normal end-organ responsiveness to parathyroid hormone. *Se Mo Suh, Adele Csima, and Donald Fraser* 2668
Serum triiodothyronine: measurements in human serum by radioimmunoassay with corroboration by gas-liquid chromatography. *Terunori Mitsuma, Noriyuki Nihei, Marvin C. Gershengorn, and Charles S. Hollander* 2679
Renal effects of calcitonin and parathyroid extract in man. Studies in hypoparathyroidism. *Heinrich G. Haas, Maximilian A. Dambacher, Jan Gunčaga, and Thierry Lauffenburger* 2689
Amino acid metabolism in exercising man. *Philip Felig and John Wahren* 2703
Glucose metabolism during leg exercise in man. *John Wahren, Philip Felig, Gunvor Ahlborg, and Lennart Jorfeldt* 2715
A hereditary immunoglobulin A abnormality: absence of light-heavy–chain assembly. Study of immunoglobulin synthesis in tonsillar cells. *Chaya Moroz, Jacob Amir, and Andre DeVries* 2726
Decreased noradrenaline (norepinephrine) synthesis in familial dysautonomia. *McC. Goodall, S. E. Gitlow, and H. Alton* 2734

CONCISE PUBLICATIONS

The effect of polystyrene beads on cyclic 3′,5′-adenosine monophosphate concentration in leukocytes. *Vincent Manganiello, Warren H. Evans, Thomas P. Stossel, Robert J. Mason, and Martha Vaughan* 2741

Flow dependence of transtubular potential difference in isolated perfused segments of rabbit proximal convoluted tubule. *Juha P. Kokko and Floyd C. Rector* 2745

Urinary excretion of pregnanetriol and Δ^5-pregnenetriol in two forms of congenital adrenal hyperplasia. *Alfred M. Bongiovanni, Walter R. Eberlein, and Thomas Moshang, Jr.* 2751

Defect in messenger RNA for human hemoglobin synthesis in beta thalassemia. *Edward J. Benz, Jr., and Bernard G. Forget* 2755

SUBJECT INDEX *

A

Absorptive cells
intestinal, synthesis and transport of lipoprotein particles by, in man, 2065
ABSTRACTS Proceedings of the 63rd Annual Meeting of The American Society for Clinical Investigation, Inc., held in Atlantic City, N. J., 3 May 1971, 1369
Acetylcholine
effect on renal cortical blood flow, 1429
***N*-Acetylneuraminic acid**
in bacterial meningitis, 979
Achalasia
role of gastrin supersensitivity of lower esophageal sphincter hypertension in, 1241
Acid-base balance
influence of graded degrees of chronic hypercapnia on acute carbon dioxide titration curve, 208
Acidemia
pulmonary vasopressor response to, in dog, 1028
Acidosis
and alkalosis, metabolic, changes in bone sodium and carbonate in, in dog, 327
and alkalosis, regulatory mechanisms of hemoglobin oxygen affinity in, 700
renal tubular, associated with Fanconi syndrome (type 2 RTA), potassium wasting in, 231
Aciduria
methylmalonic, hypoglycemia in, inhibition of mitochondrial transport systems, 2276
Adenosine monophosphate
cyclic and adenyl cyclase system of rat renal medulla, effects of vasopressin and prostaglandin E_1 on, 2461
cyclic, effect of polystyrene beads on concentration of in leukocytes, 2741
dibutyryl cyclic, effect of on function of human blood platelets, 131
Adenosine 3′,5′-monophosphate
cyclic, in human lymphocytes, alterations after phytohemagglutinin stimulation, 432
Adenosine triphosphatase
sodium-potassium–activated, distribution in medulla and cortex of kidney, 1329
Adenosine triphosphate
metabolism in human erythrocytes, effects of sodium fluoride, 1731
Adenyl cyclase
and cyclic 3′,5′-adenosine monophosphate system of rat renal medulla, effects of vasopressin and prostaglandin E_1 on, 2461
myocardial, activation of by histamine, in guinea pig, cat, and human, 1012
of adrenocortical cancer, abnormal hormone responses of, 1295
of intestinal mucosa, stimulation of by cholera enterotoxin and prostaglandins, 1218
renal, effects of calcium and prostaglandin E_1 on vasopressin activation of, 1613
Adipose cells
size and insulin sensitivity, 1399
Adipose tissue
cellular character of, in experimental human obesity, 1005
Adrenal glucocorticoids
changes in plasma sodium and chloride and induction of paralysis by, in hyperkalemic periodic paralysis, 142
Adrenal hyperplasia
urinary excretion of pregnanetriol and Δ^5-pregnenetriol in, 2751
Adrenergic agents
effect on plasma growth hormone, insulin, and free fatty acids, in man, 1069
Adrenergic stimuli
responses of coronary vessels to, 773
Adrenocortical cancer
abnormal hormone responses of adenyl cyclase, 1295
Aerosol propellant
ventricular arrhythmias induced in monkeys by inhalation of, 1546
Aging
cell culture study in progeria, 2000
Alanine
effect on glucagon secretion, 2215
Albumin
concentrations in proximal tubules of normal and nephrotic rats, micropuncture studies, 1498
hypercatabolism of in Wiskott-Aldrich syndrome, 2331
synthesis, tryptophan reversal of alcohol-induced depression of, 1812
Alcohol
depression of albumin synthesis induced by, reversal by tryptophan, 1812
Aldosterone
action of during latent period, kinetics of RNA synthesis in toad bladder epithelium, 543
metabolic clearance rate of in essential hypertension, 2184
regulation of secretion of in anephric man, 1585
Alkalosis
and acidosis, metabolic, changes in bone sodium and carbonate in, in dog, 327
and acidosis, regulatory mechanisms of hemoglobin oxygen affinity in, 700
Allergy
pollen, immunologic and cellular changes accompanying therapy of, 360
Allopurinol
effects of on coordinate activity and lability of orotidylate phosphoribosyltransferase and decarboxylase, in human erythrocytes, 1050
Altitude
high, acquired attenuation of chemoreceptor function in chronically hypoxic man, 186
high, pulmonary artery pressure and alveolar gas exchange in man during acclimatization to, 827
Alveolar macrophage
glutathione-dependent peroxidative metabolism in, 401
human, isolation, cultivation in vitro, and morphologic and functional characteristics of, 1390
Alveolar macrophages
redox state of free nicotinamide-adenine nucleotides in cytoplasm and mitochondria of, 1181
Amino acid
metabolism during leg exercise in man, 2703
and splanchnic glucose metabolism, influence of endogenous insulin secretion on, in man, 1702
Amino acid oxidase
of leukocytes, and hydrogen peroxide–mediated bacterial killing, 1985
Amino acid transport
rapid induction by phytohemagglutinin of increased α-aminoisobutyric acid uptake by lymphocytes, 818

* Abstracts listed in the Proceedings of the 63rd Annual Meeting of The American Society for Clinical Investigation, Inc., 3 May 1971, are not included in this index.

Amino acids
valine and phenylalanine, capacity of human subjects to utilize keto analogues of, 90
α-Aminoisobutryic acid
rapid induction by phytohemagglutinin of increased uptake of by lymphocytes, 818
Ammonia
production by kidney, effect of ketone bodies, 1781
Amylase
distribution, turnover, and renal excretion of, in baboon, 156
5α-Androstanediols
conversion of plasma dihydrotestosterone to, 1338
Anemia
due to glucose-6-phosphate dehydrogenase deficiency, use of xylitol in, 1421
hemolytic, caused by hemoglobin Louisville, 2395
immune hemolytic, fixation of C1 by autoimmune antibody and heterologous anti-IgG antibody, 727
immune hemolytic, relationship of cell-bound antibody to hemolysis and effect of treatment, 734
and inclusion bodies, in hemoglobin Savannah, 650
iron deficiency, hemolysis of erythrocytes in, bilirubin formation, 1847
Anemias
associated with chronic infection, malignancy, and primary hematopoietic disease, serum level of erythropoietin in, 332
Anephric man
regulation of aldosterone secretion in, 1585
Anesthesia
and cardiac depression, effects of on myocardial action of cardiac glycoside, 2585
Angiography
spontaneous fibrinolysis in pulmonary embolism demonstrable by, 474
Angioneurotic edema
hereditary, genetically determined heterogeneity of C1 esterase inhibitor in, 2143
Angiotensin II
in arterial and renal venous plasma and renal lymph, in dog, 119
Anterior hypopituitarism
role of antidiuretic hormone in abnormal water diuresis of, in man, 1478
Antibiotics
effect on uptake of streptomycin by enterococci, 2580
Antibodies
binding polyinosinic·polycytidylic acid in human and mouse lupus sera, inhibition of by viral and synthetic ribonucleic acids, 1248
specific, reversal of digoxin toxicity with, 1738
Antibody
autoimmune and heterologous anti-IgG, fixation of C1 by, in immune hemolytic anemia, 727
cell-bound, relationship of to hemolysis and effect of treatment, in immune hemolytic anemia, 734
glomerular basement membrane–reactive, in antilymphocyte globulin, 1525
specific in vivo removal of, by immunoadsorbent, 1864
to digoxin, 866
Antibody production
response of rheumatoid synovial membrane to exogenous immunization, 266
response to bacteriophage φX 174 in immunodeficiency diseases, 2559
Antidiuretic hormone
effect on peritoneal membrane area and permeability, 2437
role in abnormal water diuresis of anterior hypopituitarism, in man, 1478
Antigen
neutrophil-specific (NB1), in pathogenesis of neonatal neutropenia, 1108
site density on erythrocytes, 1840
Antilymphocyte globulin
glomerular basement membrane–reactive antibody in, 1525
Aortic constriction
independent roles of proximal tubule reabsorption and intratubular load in glomerulotubular balance during, 77
and saline infusion, proximal tubular fractional reabsorption during, in rat, 2191
Arthritis
glycosaminoglycans of cartilage of, 1712
L-Asparaginase
immunological responses to, 1080
Atherosclerosis
protein and lipid composition of arterial elastin and relationship to lipid accumulation, 1666
Autoantibodies
to nuclear antigens, relation to clinical patterns of rheumatic disease and responsiveness to therapy, 350
Autonomic nervous system
responses of coronary vessels to adrenergic stimuli, 773

B

Bacteria
contamination by in toad bladder preparations for study of RNA synthesis, 543
intestinal, alterations of in acute undifferentiated human diarrhea, in tropics, 881
Streptococcus fecalis, *Bacillus subtilis*, and *Klebsiella pneumoniae*, in intestine, vitamin B_{12} uptake by, 1100
Bacterial meningitis
neuraminidase activity in, 979
Bactericidal properties
of human alveolar macrophages, 1390
Bacteriophage
φX 174, immunologic responses to in immunodeficiency diseases, 2559
Baroreceptors
of carotid sinus, regulation of myocardial performance by, 1116
Bed rest
prolonged, effect of supplemental oral phosphate on bone mineral changes during, 2506
Beta adrenergic stimulation
by isoproterenol, depression of proximal tubular sodium reabsorption in response to, in dog, 112
Bile
effect of interruption of enterohepatic circulation on secretion and composition of, in rhesus monkey, 1917
and plasma, of man, folates in after feeding folic acid–^{3}H and 5-formyltetrahydrofolate (folinic acid), 455
Bile acid
synthesis in isolated perfused rabbit liver, 1720
synthesis in man, dihydroxycholestanoic acid metabolism, 2051
Bile acids
effect on colonic secretion of water and electrolytes in man, 1569
fecal excretion of, bile acid kinetics in patients with ileal resection, 2531
Bile flow
cholestasis induced by sodium taurolithocholate in isolated hamster liver, 2305
Bile salt
metabolism of sodium cholate–^{14}C in fetal dog, 1286
Bile salts
relationship to serum cholesterol esterifying and cholesteryl ester hydrolyzing activities in liver diseases, 259
Bilirubin
excretion in rats with normal and impaired bilirubin conjugation, effect of phenobarbital, 2606

formation in iron deficiency anemia, hemolysis of erythrocytes, 1847
measurement of synthesis of from hepatic hemes in patients with acute intermittent porphyria, 2259
photocatabolism of in congenitally jaundiced (Gunn) rat, 707
relationship to serum cholesterol esterifying and cholesteryl ester hydrolyzing activities in liver diseases, 259

Bladder
epithelium, of toad, kinetics of RNA synthesis in, action of aldosterone during latent period, 543
toad, activation energy for water diffusion in, evidence against pore enlargement hypothesis, 1016

Blood
human, effect of dibutyryl cyclic adenosine monophosphate on platelet function, 131
human peripheral lymphocytes, effect of epsilon amino caproic acid and other inhibitors of proteolysis on response of to phytohemagglutinin, 1206
neutrophil kinetics in chronic steady-state neutropenia, 1678

Blood flow
coronary, and left ventricular performance after coronary embolization with plastic microspheres, 1656
cortical, in kidney of dog, effect of renal vasodilatation on distribution of, 1429
during severe exercise before and after complete heart block, in dogs, 1950
in skin capillaries, in scleroderma, 930
measurement of cardiac output in man with nonrecirculating indicator, 1466

Bone
effect of supplemental oral phosphate on mineral changes of during prolonged bed rest, 2506
formation, mineralization, and resorption of, in hypophosphatemic rats, 2519
sodium and carbonate, changes of in metabolic acidosis and alkalosis, in dog, 327

Bone disease
and hyperparathyroidism during chronic hemodialysis, etiology of, 592
and hyperparathyroidism during chronic hemodialysis, factors affecting serum immunoreactive parathyroid hormone, 599

Bone disorders
and plasma inorganic pyrophosphate, 961

Bradykinin
effect on renal cortical blood flow, 1429

C

C1
fixation of by autoimmune antibody and heterologous anti-IgG antibody, in immune hemolytic anemia, 727

C1 esterase inhibitor
genetically determined heterogeneity of, in hereditary angioneurotic edema, 2143

C1r
subunit of first complement component, purification, properties, and assay based on linking role, 838

C3
continuing breakdown of after bilateral nephrectomy in patients with membrano-proliferative glomerulonephritis, 552
human, hypomorphic variant of, 324

Cable parameters
in myotonia congenita, 2091

Calcitonin
and parathyroid extract, renal effects of, hypoparathyroidism in man, 2689
porcine, clinical and metabolic effects on Paget's disease of bone, 1927

Calcium
accumulation in subcellular particles in congestive heart failure, 1019
effect of cortisone on active transport of by small intestine, 1309
of bone during prolonged bed rest, effect of supplemental oral phosphate, 2506
and prostaglandin E_1, effects of on vasopressin activation of renal adenyl cyclase, 1613

Candida albicans
effects of synthesis and degradation of cyclic 3′,5′-adenosine monophosphate in human leukocyte on, 920

Candidacidal activity
of human neutrophils, inhibition by sulfonamides, 2498

Carbon dioxide
titration curve, influence of hypercapnia on, 208

Carbon monoxide
endogenous production in normal and erythroblastotic newborn infants, 1

Carbonate
and sodium, changes of in bone in metabolic acidosis and alkalosis, in dog, 327

Cardiac
depression and anesthesia, effects of on myocardial action of cardiac glycoside, 2585

Cardiac function
chronotropic augmentation of, in left ventricular failure of acute and healing stages in intact conscious dogs, 217

Cardiac output
in man, measurement of with nonrecirculating indicator, 1466

Cardiac systoles
effect on by interruption of enterohepatic circulation of digitoxin by cholestryamine, in man, 2638

Cardiovascular effects
of L-dopa, modification of by decarboxylase inhibitors, 1322

Carotid sinus
baroreceptors, regulation of myocardial performance by, 1116

Carriers
of classic hemophilia, detection of by immunologic assay for antihemophilic factor (factor VIII), 255

Cartilage
normal and arthritic, glycosaminoglycans of, 1712

Catecholamines
evaluation of human norepinephrine metabolism by administration of tritiated norepinephrine, 859

Celiac sprue
incorporation of leucine-^{14}C into immunoglobulins by jejunal biopsies of patients with, 559

Cellular
and immunologic changes accompanying therapy of pollen allergy, 360

Cellular immune deficiency
distribution of immunoglobulins on surface of lymphocytes in, 2368

Cellular immunity
defective in renal failure, depression of reactivity of lymphocytes to phytohemagglutinin, 1262

Cerebrospinal fluid
transport characteristics of folates in, utilization of doubly labeled 5-methyltetrahydrofolate and 5-formyltetrahydrofolate, 1301

Chain assembly
light-heavy, absence of in hereditary immunoglobulin A abnormality, 2726

Chediak-Higashi syndrome
defective granulocyte chemotaxis in, 2645

Chemoreceptor function
acquired attenuation of, in chronically hypoxic man at high altitude, 186

Chemotaxis
defective in granulocytes in Chediak-Higashi syndrome, 2645
of polymorphonuclear leukocytes from patients with rheumatoid arthritis, 2541
Chloride
in myotonia congenita, 2091
and sodium, plasma changes of and induction of paralysis by adrenal glucocorticoids in hyperkalemic periodic paralysis, 142
Cholera
ion transport during ileal secretion induced by, in dog, 312
Cholera enterotoxin
and prostaglandins, stimulation of intestinal mucosal adenyl cyclase, 1218
Cholestasis
induced by sodium taurolithocholate in isolated hamster liver, 2305
Cholesterol
esterifying and cholesteryl ester hydrolyzing activities in serum in liver diseases, 259
in bile, effect of interruption of enterohepatic circulation, in rhesus monkey, 1917
and triglyceride, of chylomicrons, metabolism by liver and extrahepatic tissues of sheep and dogs, 1831
Cholesterol synthesis
in intestine of man, regional differences and control mechanisms, 872
Cholestryamine
interruption of enterohepatic circulation of digitoxin by, effect on metabolism of digitoxin-^{3}H and cardiac systolic intervals, in man, 2638
interruption of enterohepatic circulation of digitoxin by, protection against lethal digitoxin intoxication, 2626
Chylomicron
triglyceride and cholesterol metabolism, by liver and extrahepatic tissues of sheep and dogs, 1831
Cilia
of tracheobronchial tree of normal subjects, smokers and nonsmokers, deposition and clearance of 2 μ particles in, 1411
Circulation
enterohepatic, effect of interruption of on secretion and composition of bile, in rhesus monkey, 1917
extracorporeal, specific removal of in vivo antibody by immunoadsorbent, 1864
Cirrhosis
of liver, fibrinogen metabolism in, 1690
of liver, regional lung function in patients with, 2403
Clearance
and micropuncture studies, postnatal development of renal function in dog, 779
Clofibrate
inhibition of hepatic triglyceride formation by, 2339
Coagulation
fibrinogen metabolism in cirrhosis of liver, 1690
in fibrinogen Baltimore, 1874
intravascular, detection of, 2235
Cobalt
and iron, intestinal transport mechanism for, in rat, 2384
Collagen
fibers, human platelet adhesion to, 1854
platelet aggregation induced by, inhibition by normal plasma, 2168
Collagenase
rheumatoid synovial, in vitro and in vivo studies, 2056
Colon
secretion of water and electrolytes by, effect of bile acids, perfusion studies in man, 1569
Complement-derived leukotactic factors
in inflammatory synovial fluids of humans, 606
Complement-fixing activity
of cryoproteins in rheumatoid synovial fluid, 282
Congestive heart failure
calcium accumulation in subcellular particles in, 1019
Connective tissue disease
autoantibodies to nuclear antigens in, responsiveness to therapy, 350
Coronary artery disease
effects of nitroglycerin on regional myocardial blood flow in, 1578
Coronary circulation
responses to adrenergic stimuli, 773
Coronary flow
and left ventricular performance after coronary embolization with plastic microspheres, 1656
Cortisone
effect on active transport of calcium by small intestine, 1309
Counterpulsation
intra-aortic, effects of on cardiac performance and metabolism in shock associated with acute myocardial infarction, 1885
Creatine phosphokinase
quantitative assessment of myocardial infarction by analysis of serial changes of, 2614
Cryoglobulinemia
mixed reaction with IgG subclasses, 951
Cryoproteins
with complement-fixing activity in rheumatoid synovial fluid, 282
Cyclic 3′,5′-adenosine monophosphate
effect on proximal tubular sodium reabsorption, 1231
in human leukocyte, synthesis, degradation, and effects on neutrophil candidacidal activity, 920
and parathyroid hormone, mode of action of on renal tubular phosphate reabsorption, in dog, 617
Cyclophosphamide
effect on mitotic cycle in acute leukemia, synchronization and recruitment, 2204
Cystinuria
biochemical and genetic studies, double heterozygotes of genotype I/II, 1961
Cytoplasm
and mitochondria of alveolar macrophages, redox state of free nicotinamide-adenine nucleotides, 1181
Cytosine arabinoside
effect on mitotic cycle in acute leukemia, synchronization and recruitment, 2204
Cytotoxic antibody
human sera with, 1514

D

Decarboxylase inhibitors
modification of cardiovascular effects of L-dopa by, 1322
Dehalogenase defect
experimental model for, effects of nitrotyrosine on thyroid function in rat, 2474
Deoxyribonucleic acid synthesis
in normal and stimulated human lymphocytes, in vitro effect of salicylate on, 226
Diabetes
juvenile, growth hormone response to exercise in, 1806
Diabetes insipidus
hereditary, micropuncture study of collecting tubule function, in rats, 2445
Diarrhea
acute undifferentiated, in tropics, alterations in intestinal fluid and electrolyte movements, 890
acute undifferentiated, in tropics, alterations in intestinal microflora, 881
Diazoxide
effects on biphasic insulin release, "adrenergic" suppression and enhancement in perfused rat pancreas, 1444

Dibutyryl cyclic adenosine monophosphate
effect on proximal tubular sodium reabsorption, 1231
Digitoxin
interruption of enterohepatic circulation of by cholestryamine, effect on metabolism of digitoxin-^{3}H and cardiac systolic intervals, in man, 2638
interruption of enterohepatic circulation of by cholestryamine, protection against lethal intoxication by, 2626
Digoxin
toxicity, reversal with specific antibodies, 1738
Digoxin toxicity
immunological protection against, 866
Dihydrotestosterone
metabolic clearance rate, origin, and conversion to 5α-androstanediols of, 1338
source of in human plasma, 1621
3α,7α-Dihydroxy-5β-cholestan-26-oic acid
formation and metabolism of in man, 2051
Dipeptides
intestinal transport of, in man, 2266
Diphenylhydantoin
and potassium transport in isolated nerve terminals, 1977
2,3-Diphosphoglycerate
effect on hemoglobin oxygen affinity, in acidosis and alkalosis, 700
Diplococcus pneumoniae
alterations in thyroid hormone economy during acute infection with, in rhesus monkey, 378
Disease
activity, physiological assessment of, in rheumatoid arthritis, 1167
Diuresis
of anterior hypopituitarism in man, role of antidiuretic hormone, 1478
L-Dopa
modification of cardiovascular effects of by decarboxylase inhibitors, 1322
Dopamine
decreased noradrenaline (norepinephrine) synthesis in familial dysautonomia, 2734
Dwarfism
hypopituitary, differentiation of hypothalamic and pituitary forms by effect of thyrotropin-releasing factor on serum thyroid–stimulating hormone, 2219
Dysautonomia
familial, decreased noradrenaline (norepinephrine) synthesis in, 2734
Dysfibrinogenemia
congenital, with delayed fibrinopeptide release, (fibrinogen Bethesda), 1819
Dystrophy
myotonic, effects of on responsiveness to human growth hormone, 1941

E

Elastin
arterial, protein and lipid composition of, relationship to lipid accumulation in atherosclerotic plaque, 1666
Electrolytes
and intestinal fluid, alterations of in acute undifferentiated human diarrhea, in tropics, 890
and water, colonic secretion of induced by bile acids, perfusion studies in man, 1569
and water, intestinal transport of, during extracellular volume expansion, in dogs, 2569
Embolism
pulmonary, hypoxemia in, 481
pulmonary, spontaneous fibrinolysis in, 474
Embolization
coronary, with plastic microspheres, left ventricular performance and coronary flow after, 1656
Energy
utilization by cardiac muscle, influence of thyroid state on, 463
Energy metabolism
in human erythrocytes, effects of sodium fluoride, 1731
Enterococci
effect of antibiotics on uptake of streptomycin by, 2580
Enzyme changes
in myocardial infarction, 2614
Enzymes
for glutathione synthesis, identification of in hemolysates of human erythrocytes, 507
Epinephrine
selective inhibition of acute insulin response to glucose, 2230
Epsilon amino caproic acid
effect of on response of human peripheral blood lymphocytes to phytohemagglutinin, 1206
Erythroblastosis
in newborn infants, endogenous production of carbon monoxide, 1
Erythrocyte
antigen site density, 1840
metabolic alterations in, produced by increases in glucose concentration, role of polyol pathway, 2104
pyruvate kinase deficiency, selective reticulocyte destruction in, 688
Erythrocytes
aging in vivo, 1373
coordinate activity and lability of orotidylate phosphoribosyltransferase and decarboxylase in, effects of allopurinol, 1050
hemolysis of in iron deficiency anemia, bilirubin formation, 1847
human, effects of sodium fluoride on energy metabolism in, 1731
human, glutathione synthesis in, 1637
human, identification of enzymes of glutathione synthesis in hemolysates of, 507
in Liddle's syndrome, abnormal membrane sodium transport in, 2253
Erythroid cells
ribonuclease in, activation by urea and localization to cell membrane, 60
Erythropoietic protoporphyria
multiple sites of excess protoporphyrin formation, 203
Erythropoietin
serum level of in anemias associated with chronic infection, malignancy, and primary hematopoietic disease, 332
Esophageal sphincter
hormonal regulation of, interaction of gastrin and secretin, 449
Esophagus
hypertension of lower sphincter in achalasia, role of gastrin supersensitivity in pathogenesis of, 1241
mechanical properties of wall, 1456
Estradiol
plasma, index of fetoplacental function, 1490
Ethanol
effect on glucose-lactate interrelationships, 175
hyperlacticacidemia induced by, inhibition of lactate utilization, 166
Exercise
adaptation of muscle to, increase of palmityl CoA synthetase, carnitine palmityltransferase, and palmityl CoA dehydrogenase, 2323
growth hormone response to, in juvenile diabetes, 1806
in man, effect on amino acid metabolism, 2703
in man, effects on glucose metabolism, 2715
in patients with obstructive lung disease, ventilatory mechanics and expiratory flow limitation during, 910
peripheral vascular response to before and after complete heart block, in dogs, 1950

Expiratory flow
and ventilatory mechanics in patients with obstructive lung disease, 910

F

Factor VIII
antihemophilic factor, detection of carriers of classic hemophilia using immunologic assay for, 255
Factor VIII deficiency
classic hemophilia and von Willebrand's disease, immunologic differentiation of, 244
Fanconi syndrome
(type 2 RTA), potassium wasting in renal tubular acidosis associated with, 231
Fat
storage of vitamin D_3, in rat, 679
Fat cell
size and insulin sensitivity, 1399
Fetal dog
bile salt metabolism in, 1286
Fetoplacental function
plasma estradiol as index of, 1490
Fetus
vitamin B_{12} in, 1000
Fibrin
human, effect of fibrin-stabilizing factor on subunit structure of, 1506
Fibrinogen
measurement of in human plasma, 2235
metabolism in cirrhosis of liver, 1690
Fibrinogen Baltimore
hereditary, functional evaluation of, 1874
Fibrinogen Bethesda
congenital dysfibrinogenemia with delayed fibrinopeptide release, 1819
Fibrinolysis
spontaneous, in pulmonary embolism, 474
Fibrinopeptide
delayed release in fibrinogen Bethesda, congenital dysfibrinogenemia, 1819
Fibrinopeptides
in fibrinogen Baltimore, 1874
Fibrin-stabilizing factor
effect on subunit structure of human fibrin, 1506
Fibroblast cultures
of skin, in progeria, 2000
Fibroblasts
human, inherited propionly-CoA carboxylase deficiency in "ketotic hyperglycinemia," 127
Flow rate
effect on transtubular potential difference in rabbit proximal tubule, 2745
Fluid
and electrolyte movements, intestinal, alterations of in acute undifferentiated human diarrhea, in tropics, 890
Fluid reabsorption
and glomerulotubular balance by renal proximal tubule, role of postglomerular vascular protein concentration, 336
inhibition of by renal proximal tubule of volume-expanded rat, 1596
and volume depletion in proximal tubule, 1379
Fluoride
effects on energy metabolism in human erythrocytes, 1731
Fluoroalkane gas
ventricular arrhythmias induced in monkeys by inhalation of, 1546
Fluorochromasia cytotoxicity assay
comparison of HL-A phenotypes of lymphocytes and kidney cells determined by, 274
Folate absorption
by intestine, 1910
Folate metabolism
in plasma and bile of man after feeding folic acid–^{3}H and 5-formyltetrahydrofolate (folinic acid), 455
Folate transport
in cerebrospinal fluid, utilization of doubly labeled 5-methyltetrahydrofolate and 5-formyltetrahydrofolate, 1301
Folate-binding factor
in chronic myelogenous leukemia, 719
Folic acid
absorption and metabolism of, after exposure of isolated intestine to synthetic pteroylpolyglutamates, 2009
binding of by peripheral cells in chronic myelogenous leukemia, 719
and 5-formyltetrahydrofolate (folinic acid), folates in plasma and bile of man after feeding, 455
transport and metabolism of sarcosine in hypersarcosinemic and normal phenotypes, 2313
Folinic acid
(5-formyltetrahydrofolate) and folic acid, folates in plasma and bile of man after feeding, 455
Forearm metabolism
during progressive starvation, in human, 1536
5-Formyltetrahydrofolate
transport characteristics of in cerebrospinal fluid, 1301
Free fatty acids
effect on myocardial function and oxygen consumption in intact dogs, 1386
in human blood, effect of adrenergic agents on, 1069
metabolism by human forearm during starvation, 1536
and myocardial oxygen consumption, 1869
triglyceride and insulin, diurnal fluctuations in during sucrose consumption and insulin infusion, in man, 583

G

Galactosemia
galactose-1-phosphate uridyl transferase, activity in liver, 500
Galactose-1-phosphate uridyl transferase
activity in livers of normal and galatosemic subjects, 500
Gas exchange
alveolar, and pulmonary artery pressure, in man during acclimatization to high altitude, 827
Gastrin
interaction with secretin, hormonal regulation of human lower esophageal sphincter, 449
supersensitivity of in pathogenesis of lower esophageal sphincter hypertension in achalasia, 1241
Gastrointestinal diseases
incorporation of leucine-^{14}C into immunoglobulins by jejunal biopsies of patients with, 559
Gastrointestinal tract
mechanical properties of esophageal wall, 1456
Giant cell
of human alveolar macrophage, isolation, cultivation in vitro, and morphologic and functional characteristics of, 1390
Globin synthesis
of heme-free β^{GH} chain, subunit exchange with free α-chain pool, in hemoglobin Gun Hill, 388
Globulin
antilymphocyte, glomerular basement membrane–reactive antibody in, 1525
α_2-macro-, separation of into five components with differing electrophoretic and enzyme-binding properties, 2376
thyroxine-binding, effects of norethandrolone on transport and peripheral metabolism of thyroxine in patients lacking, 1644
thyroxine-binding, preparation and properties of, 1758
Glomerular basement membrane–reactive antibody
in antilymphocyte globulin, 1525
Glomerular filtrate
intrarenal distribution of, and proximal reabsorption, effect of saline infusions on, in dog, 514

Glomerular function
and single nephron filtration rate during hydropenia, elevated ureteral pressure, and acute volume expansion, 2230
Glomerular tubular balance
and glucose reabsorption rate, effect of extracellular fluid volume expansion on, in single rat nephron, 2414
Glomerular ultrafiltration
dynamics of, in rat, 1776
Glomeruli
intracortical distribution of number and volume of, during postnatal maturation in dog, 796
Glomerulonephritis
acute and chronic, with hypocomplementemia, glomerular deposition of properdin in, 642
changing types of nephritogenic streptococci, in Trinidad, 1197
membrano-proliferative, continuing C3 breakdown after bilateral nephrectomy in patients with, 552
Glomerulotubular balance
during aortic constriction, independent roles of proximal tubular reabsorption and intratubular load in, 77
and fluid reabsorption by renal proximal tubule, role of postglomerular vascular protein concentration, 336
Glucagon
effect of alanine on secretion of, 2215
effect of insulin deficiency on secretion of, 1992
pancreatic immunoreactive, glycogenolytic activity of in plasma, 1650
secretion from isolated perfused dog pancreas, 2123
Glucocorticoids
adrenal, changes in plasma sodium and chloride and induction of paralysis by, in hyperkalemia periodic paralysis, 142
Glucose
and lactate, effect of ethanol on interrelationships of, 175
and lipid homeostasis in absence of human growth hormone, 574
metabolic alterations in human erythrocyte produced by increases of, role of polyol pathway, 2104
metabolism by adipose cells of different size, effect of insulin on, 1399
metabolism during leg exercise in man, 2715
oxidative metabolism in man, effects of thyroid disease on, compartmental model analysis, 627
reabsorption rate and glomerular tubular balance, effect of extracellular fluid volume expansion on, in single rat nephron, 2414
selective inhibition by epinephrine of acute insulin response to, 2453
splanchnic, and amino acid metabolism, influence of endogenous insulin secretion on, in man, 1702
Glucose oxidation
glutathione-dependent peroxidative metabolism in alveolar macrophage, 401
Glucose-6-phosphate dehydrogenase
oxidant injury of red blood cells deficient in, by phagocytosing leukocytes during infection, 2466
use of xylitol in anemia due to deficiency of, 1421
Glucose-6-phosphate dehydrogenase deficiency
Mediterranean phenotype, genetic diversity of, 1253
Glutamate
and glutamine metabolism, muscle and splanchnic, in postabsorptive and starved man, 814
Glutamine
and glutamate metabolism, muscle and splanchnic, in postabsorptive and starved man, 814
Glutathione
peroxidative metabolism dependent on, in alveolar macrophage, 401
synthesis in human erythrocytes, 1637
Glutathione synthesis
identification of enzymes of, in hemolysates of human erythrocytes, 507
Glycine
transport and metabolism of sarcosine in hypersarcosinemic and normal phenotypes, 2313
Glycogenolytic activity
of immunoreactive pancreatic glucagon in plasma, 1650
Glycosaminoglycans
of normal and arthritic cartilage, 1712
Gonadotropin
effect of ovariectomy on release of, 1149
Grafts
marrow, between canine siblings, matched by serotyping and mixed leukocyte culture, 1272
Granulocytes
blood neutrophil kinetics in chronic steady-state neutropenia, 1678
defective chemotaxis of in Chediak-Higashi syndrome, 2645
mediators of histamine release from, 1044
Granulocytopoiesis
stimulation of by diffusible factor in vivo, 2004
Growth hormone
human, autoregulation of, effect of administration of on plasma growth hormone, cortisol, glucose, and free fatty acid response to insulin, 940
human, effect of lipids on secretion of, 1439
human, effects of endogenous deficiency of and myotonic dystrophy on responsiveness to, 1941
human, glucose and lipid homeostasis in absence of, 574
human, metabolic response to during prolonged starvation, 411
plasma, effect of adrenergic agents on, in man, 1069
response to exercise in juvenile diabetes, 1806
Guanethidine
effect on skin capillary blood flow in scleroderma, 930
Gunn rats
congenitally jaundiced, photocatabolism of labeled bilirubin in, 707
effect of phenobarbital on bilirubin excretion in, 2606

H

Heart
excitation-contraction coupling in, calcium accumulation in subcellular particles in congestive heart failure, 1019
Heart block
peripheral vascular response to exercise before and after, in dogs, 1950
Hematopoietic disease
chronic infection and malignancy, serum level of erythropoietin in anemias associated with, 332
Heme oxygenase
inducible, in kidney, model for homeostatic control of hemoglobin catabolism, 2042
Hemes
hepatic, measurement of synthesis of bilirubin from, in patients with acute intermittent porphyria, 2259
Hemodialysis
chronic, etiology of hyperparathyroidism and bone disease during, 592
chronic, etiology of hyperparathyroidism and bone disease during, factors affecting serum immunoreactive parathyroid hormone, 599
Hemodynamics
chronotropic augmentation of cardiac function in left ventricular failure of acute and healing stages in intact conscious dogs, 217

effects of cardiac depression and of anesthesia on myocardial action of cardiac glycoside, 2585
effects of intra-aortic counterpulsation on cardiac performance and metabolism in shock associated with acute myocardial infarction, 1885
effects of nitroglycerin on regional myocardial blood flow in coronary artery disease, 1578
effects of posture and isoproterenol on velocity of left ventricular contraction, in man, 2305
estimation of V_{max} in auxotonic systoles from rate of relative increase of isovolumic pressure: (dP/dt)kP, 1276
excitation-contraction coupling in heart, calcium accumulation in subcellular particles in congestive heart failure, 1019
hypoxemia in pulmonary embolism, 481
influence of scar on left ventricular performance at onset of myocardial ischemia, shock versus heart failure, 534
intrarenal, relationship to renin in hemorrhagic hypotension, 970
left ventricular function in acute myocardial infarction, 523
left ventricular performance and coronary flow after coronary embolization with plastic micropheres, 1656
measurement of cardiac output in man with nonrecirculating indicator, 1466
mechanochemistry of cardiac muscle, influence of thyroid state on energy utilization, 463
performance of right ventricle under stress, relation to right coronary flow, 2176
peripheral vascular response to severe exercise before and after complete heart block, in dogs, 1950
pressure-flow studies on man, effect of atrial systole on ventricular function in mitral stenosis, 2653
pulmonary artery pressure and alveolar gas exchange in man during acclimatization to high altitude, 827
pulmonary vasomotor reactivity during alveolar hypoxia and serotonin and histamine infusion, in dog, 2550
pulmonary vasopressor response to decrease in blood pH, in dog, 1028
quantitative assessment of myocardial infarction by analysis of serial changes in serum creatine phosphokinase activity, 2614
regulation of myocardial performance by carotid sinus baroreceptors, 1116
relationship between plasma sodium concentration and vascular reactivity, in man, 2022

Hemoglobin
isolation and translation of messenger RNA of, from thalassemia, sickle cell anemia, and normal human reticulocytes, 2458
model for homeostatic control of catabolism of, inducible heme oxygenase in, 2042
regulatory mechanisms of oxygen affinity of, in acidosis and alkalosis, 700
relation of anomaly to α-thalassemia and hemoglobin H disease, 1628
synthesis, human, defect in messenger RNA for in beta thalassemia, 2755

Hemoglobin Gun Hill
increased synthesis of heme-free β^{GH} globin chain and subunit exchange with free α-chain pool, 388

Hemoglobin H disease
and α-thalassemia, relation of hemoglobin anomaly to, 1628

Hemoglobin Hiroshima
ligand kinetics in, 1772

Hemoglobin J Cape Town
oxygen equilibrium in, 1554

Hemoglobin Louisville
β42 (CD1) phe → leu, unstable variant causing hemolytic anemia, 2395

Hemoglobin Savannah
B6 (24) β-glycine → valine, unstable variant causing anemia with inclusion bodies, 650

Hemolysis
erythrocyte antigen site density, 1840
of erythrocytes in iron deficiency anemia, bilirubin formation, 1847
relationship of cell-bound antibody to and effect of treatment, in immune hemolytic anemia, 734

Hemophilia
classic, detection of carriers of using immunologic assay for antihemophilic factor (factor VIII), 255
classic (factor VIII deficiency), and von Willebrand's disease, immunologic differentiation of, 244

Hemorrhagic hypotension
relationship between renin and intrarenal hemodynamics in, 970

Hepatic proteins
Y and Z, cytoplasmic organic anion-binding, effect of drugs, chemicals, hormones, and cholestasis, 2242

Histamine
activation of myocardial adenyl cyclase by, in guinea pig, cat, and human heart, 1012
release from human platelets, lymphocytes, and granulocytes, 1044
and serotonin infusion, and alveolar hypoxia, pulmonary vasomotor reactivity during, in dog, 2550

Histiocytosis
and vasopressin secretion, "essential" hypernatremia due to ineffective osmotic and intact volume regulation of, 97

Histocompatibility
and marrow grafts in canine siblings, 1272

HL-A phenotypes
of lymphocytes and kidney cells, comparison of by fluorochromasia cytotoxicity assay, 274

HL-A specificity
human sera with cytotoxic activity, 1514

Hormonal regulation
of human lower esophageal sphincter, interaction of gastrin and secretin, 449

Hormone responses
abnormal, of adrenocortical cancer adenyl cyclase, 1295

Human
erythrocytes, identification of enzymes of glutathione synthesis in hemolysates of, 507

Humoral mechanism
in volume expansion natriuresis, 1603

Hydatidiform mole
thyroid hormone economy in patients with, 1345

Hydrogen
measurement of human cardiac output with, 1466

Hydrogen peroxide
production of in leukocytes, relation to amino acid oxidase, 1985
utilization in myeloperoxidase-deficient leukocytes, possible microbicidal control mechanism, 2226

25-Hydroxycholecalciferol
in human plasma, 2159

Hypercapnia
chronic, influence of graded degrees of on acute carbon dioxide titration curve, 208

Hyperkalemic periodic paralysis
changes in plasma sodium and chloride, induction of paralysis by adrenal glucocorticoids, 142

Hyperlipoproteinemia
type III, lipoprotein abnormality, 754

Hypernatremia
"essential," due to ineffective osmotic and intact volume regulation of vasopressin secretion, 97
Hyperosmolality
and hypernatremia, regulation of vasopressin secretion, 97
Hyperparathyroidism
and bone disease during chronic hemodialysis, etiology of, 592
and bone disease during chronic hemodialysis, factors affecting serum immunoreactive parathyroid hormone, 599
pathogenesis of, in chronic renal insufficiency, in dog, 493
plasma insulin disturbances in, 2596
primary, and due to nonparathyroid cancer, immunologic differentiation of, 2079
Hypersarcosinemia
transport and metabolism of sarcosine in, 2313
Hypertension
benign essential, decreased metabolic clearance rate of aldosterone in, 2184
due to L-dopa, modification of by decarboxylase inhibitors, 1322
of lower esophageal sphincter in achalasia, role of gastrin supersensitivity, 1241
Hypertriglyceridemia
carbohydrate-induced, biochemical and morphological study of very low density lipoproteins in, 1355
Hypocalcemia
pathogenesis of in magnesium depletion, normal end-organ responsiveness to parathyroid hormone, 2668
Hypocomplementemia
glomerular deposition of properdin in acute and chronic glomerulonephritis with, 642
Hypogammaglobulinemia
and accelerated catabolism of IgG secondary to interaction with IgG-reactive monoclonal IgM, 951
distribution of immunoglobulins on surface of lymphocytes in, 2368
Hypomorphic variant
of human C3, 324
Hypoparathyroidism
renal effects of calcitonin and parathyroid extract, in man, 2689
Hypophosphatasia
serum alkaline phosphatase in, 2137
Hypopituitarism
anterior, role of antidiuretic hormone in abnormal diuresis of, in man, 1478
Hypopituitary dwarfism
hypothalamic and pituitary forms, differentiation of by effect of thyrotropin-releasing factor on serum thyroid-stimulating hormone, 2219
Hypoxemia
in pulmonary embolism, clinical study, 481
Hypoxia
acquired attenuation of chemoreceptor function at high altitude, 186
alveolar, and serotonin and histamine infusion, pulmonary vasomotor reactivity during, in dog, 2550
myocardial, tension prolongation during recovery from, 660

I

IgA
hereditary abnormality, absence of light-heavy chain assembly, immunoglobulin synthesis in tonsillar cells, 2726
IgG
hypogammaglobulinemia associated with accelerated catabolism of, secondary to interaction with IgG-reactive monoclonal IgM, 951
Ileal resection
and bile acid excretion, 2531
Ileum
ion transport during cholera-induced secretion in, in dog, 312
Illness
effect on resting transmembrane potential difference of skeletal muscle, 49
Immunization
exogenous, response of rheumatoid synovial membrane to, 266
Immunoadsorbent
specific removal of in vivo antibody by extracorporeal circulation over, 1864
Immunodeficiency diseases
immunologic response to bacteriophage ϕX 174, 2559
Immunoglobulin
synthesis in tonsillar cells, absence of light-heavy chain assembly, hereditary IgA abnormality, 2726
Immunoglobulins
hypercatabolism of in Wiskott-Aldrich syndrome, 2331
incorporation of leucine-^{14}C into, by jejunal biopsies of patients with celiac sprue and other gastrointestinal diseases, 559
on surface of lymphocytes, distribution of in hypogammaglobulinemia, cellular immune deficiency, and chronic lymphatic leukemia, 2368
Immunologic
and cellular changes accompanying therapy of pollen allergy, 360
Immunologic assay
for antihemophilic factor (factor VIII), detection of carriers of classic hemophilia using, 255
Immunologic differentiation
of classic hemophilia (factor VIII deficiency and von Willebrand's disease, 244
of primary hyperparathyroidism from hyperparathyroidism due to nonparathyroid cancer, 2079
Immunological protection
against digoxin toxicity, 866
Immunological responses
to L-asparaginase, 1080
Inclusion bodies
in red blood cells of hemoglobin Savannah, 650
Infection
chronic, malignancy, and primary hematopoietic disease, serum level of erythropoietin in anemias associated with, 332
oxidant injury of glucose-6-phosphate dehydrogenase–deficient red blood cells by phagocytosing leukocytes during, 2466
with *Diplococcus pneumoniae*, in rhesus monkey, alterations in thyroid hormone economy during, 378
Inflammatory disease
human, complement-derived leukotactic factors in synovial fluids in, 606
Inositides
of human platelets, influence of ionic environment on incorporation of orthophosphate-^{32}P, 762
Insulin
biphasic release in perfused rat pancreas, effect of diazoxide on, 1444
circulating, in basal state and in patients and hamsters with islet cell tumors, proinsulin-like component of, 2113
effect of deficiency of on glucagon secretion, 1992
effect of on glucose metabolism by adipose cells of different size, 1399
effect on peripheral utilization of ketone bodies, in dogs, 801
immunoreactive, effect of adrenergic agents on, in man, 1069
influence of endogenous secretion on splanchnic glucose and amino acid metabolism, in man, 1702
infusion and sucrose consumption, diurnal fluctuations in triglyceride, free fatty acids, and insulin during, in man, 583
plasma disturbances in primary hyperparathyroidism, 2596

plasma, and pancreatic islet secretion of, effects of pregnancy, estradiol, and progesterone on, 992
proinsulin-like properties of "big" insulin in patients without islet cell tumors, 849
response to glucose, selective inhibition by epinephrine, 2230
stimulation of secretion by maltose, 986
tolerance tests, effect of human growth hormone on, 940
triglyceride and free fatty acids, diurnal fluctuations in during sucrose consumption and insulin infusion, in man, 583

Insulin-specific protease
direct measurement of proinsulin in human plasma by use of, 1792

Interferon
stimulated production of by phytohemagglutinin, interaction of human macrophages and lymphocytes, 744

Intestine
absorption of 5-methyltetrahydrofolic acid by, 1910
alterations of fluid and electrolyte movements in acute undifferentiated human diarrhea, in tropics, 890
alterations of microflora in acute undifferentiated human diarrhea, in tropics, 881
human, cholesterol synthesis in, regional differences and control mechanisms, 872
human, transport of dipeptides in, 2266
mechanism of decreased sodium and water absorption by after acute volume expansion, in rat, 2355
of dog, folate absorption in, after exposure to synthetic pteroylpolyglutamates, 2009
small, effect of cortisone on active transport of calcium by, 1309
stimulation of adenyl cyclase in mucosa of, by cholera enterotoxin and prostaglandins, 1218
synthesis and transport of lipoprotein particles by absorptive cells of, in man, 2065
transport mechanism of for cobalt and iron, in rat, 2384
transport of water and electrolytes by, during extracellular volume expansion, in dogs, 2569
vitamin B_{12} uptake by microorganisms in, relevance to syndromes of intestinal bacterial overgrowth, 1100

Intoxication
by digitoxin, protection against by cholestryamine, 2626

Ion transport
during cholera-induced ileal secretion, in dog, 312

Iron
and cobalt, intestinal transport mechanism for, in rat, 2384

Ischemia
myocardial, influence of scar on left ventricular performance at onset of, shock versus heart failure, 534

Islet cell
proinsulin-like component of circulating insulin in patients with tumors of, 2113

Isoproterenol
depression of proximal tubular sodium reabsorption in response to renal beta adrenergic stimulation, in dog, 112
effect of inhibition of lipolysis on myocardial oxygen consumption in presence of, 1869
and posture, effects of on velocity of left ventricular contraction, in man, 2283

J

Jaundice
congenital, in Gunn rats, photocatabolism of labeled bilirubin in, 707

Jejunal biopsies
of patients with celiac sprue and other gastrointestinal diseases, incorporation of leucine-^{14}C into immunoglobulins by, 559

K

Kallikrein
separation of from plasma thromboplastin antecedent by plasma α_2-macroglobulin, kallikrein inhibitor, 2084

Keto acids
analogues of valine and phenylalanine, capacity of human subjects to utilize 90

Ketone bodies
effect of insulin on peripheral utilization of, in dogs, 801
effect of on renal ammoniogenesis, 1781
metabolism by human forearm during starvation, 1536

Ketotic hyperglycinemia
inherited propionyl-CoA carboxylase deficiency in, 127

Kidney
accelerated reabsorption in proximal tubule produced by volume depletion, 1379
adaptation in potassium excretion with nephron reduction, in dog, 1061
angiotensin II in arterial and renal venous plasma and renal lymph in, in dog, 119
biochemical and genetic studies in cystinuria, double heterozygotes of genotype I/II, 1961
continuing C3 breakdown after bilateral nephrectomy in patients with membrano-proliferative glomerulonephritis, 552
defective cellular immunity in renal failure, depressed reactivity of lymphocytes to phytohemagglutinin, 1262
depression of proximal tubular sodium reabsorption in response to renal beta adrenergic stimulation, by isoproterenol, in dog, 112
disease in dog and man, inhibition of sodium reabsorption after saline load, 422
distribution of sodium-potassium–activated ATPase in medulla and cortex of, 1329
distribution, turnover, and renal excretion of amylase in baboon, 156
dynamics of glomerular ultrafiltration in rat, 1776
effect of cyclic 3′,5′-adenosine monophosphate and dibutyryl adenosine 3′,5′-cyclic monophosphate, 1231
effect of extracellular fluid volume expansion on glucose reabsorption rate and glomerular tubular balance in single rat nephron, 2414
effect of ketone bodies on ammoniogenesis by, 1781
effect of renal vasodilatation on distribution of cortical blood flow, in dog, 1429
effect of renal vein constriction on sodium permeability of proximal tubule, in rat, 294
effect of saline infusion on intrarenal distribution of glomerular filtrate and proximal reabsorption, in dog, 514
effects of vasopressin and prostaglandin E_1 on adenyl cyclase-cyclic 3′,5′-adenosine monophosphate system of rat renal medulla, 2461
flow dependence of transtubular potential difference in rabbit proximal tubule, 2745
glomerular filtration pressure and single nephron filtration rate during hydropenia, elevated ureteral pressure, and acute volume expansion, 2230
independent roles of proximal tubular reabsorption and intratubular load in glomerulotubular

balance during aortic constriction, in rat, 77
inducible heme oxygenase in, model for homeostatic control of hemoglobin catabolism, 2042
inhibition of fluid reabsorption by renal proximal tubule of volume-expanded rat, 1596
lysozyme turnover in rat, 473
micropuncture studies of proximal tubule albumin concentration in normal and nephrotic rats, 1498
micropuncture study of collecting tubule function in rats with hereditary diabetes insipidus, 2445
mode of action of parathyroid hormone and cyclic adenosine 3′,5′-monophosphate on renal tubular phosphate reabsorption, in dog, 617
pathogenesis of hyperparathyroidism in chronic renal insufficiency, in dog, 493
postobstructive, nephron function in, in dog, 1154
potassium wasting in renal tubular acidosis associated with Fanconi syndrome (type 2 RTA), 231
proximal tubular fractional reabsorption during saline infusion and aortic constriction, in rat, 2191
regulation of aldosterone secretion in anephric man, 1585
renal effects of calcitonin and parathyroid extract, hypoparathyroidism in man, 2689
renal handling of low molecular weight proteins, light chain metabolism in experimental renal disease, 901
renal handling of phosphorus in oliguric and nonoliguric mercury-induced acute renal failure, in rats, 2347
role of postglomerular vascular protein concentration in fluid reabsorption and glomerulotubular balance by renal proximal tubule, 336
transport and metabolism of sarcosine in hypersarcosinemic and normal phenotypes, 2313
transport of sodium chloride and water in renal proximal tubule, 69

Kidney cells
and lymphocytes, comparison of HL-A phenotypes of by fluorochromasia cytotoxicity assay, 274

Kidney disease
effects on transport of vitamin A in human plasma, 2426

L

Lactate
and glucose, effect of ethanol on interrelationships of, 175
inhibition of utilization by ethanol, 166

Lactogen
secretion of by placenta, in monkey, 2660

Lecithin:cholesterol acyltransferase deficiency
electron microscopy study of low and high density plasma lipoproteins in, 1141
physical and chemical studies of low and high density plasma lipoproteins in, 1131

Leucine-^{14}C
incorporation of into immunoglobulins by jejunal biopsies of patients with celiac sprue and other gastrointestinal diseases, 559

Leukemia
chronic lymphatic, distribution of immunoglobulins on surface of lymphocytes in, 2368
chronic myelogenous, folate-binding factor in, 719
defective control of ribosomal RNA processing in stimulated lymphocytes in, 2485
synchronization and recruitment in, chemotherapy of, 2204

Leukocyte
cyclic 3′,5′-adenosine monophosphate in, synthesis, degradation, and effects on neutrophil candidacidal activity, 920
mixed culture, and serotyping, marrow grafts between canine siblings matched by, 1272

Leukocytes
amino acid oxidase of, and hydrogen peroxide–mediated bacterial killing, 1985
effect of polystyrene beads on cyclic AMP concentration in, 2741
in Chediak-Higashi syndrome, 2645
metabolic effect of morphine analogue levorphanol on, at rest and during phagocytosis, 1091
myeloperoxidase-deficient, utilization of hydrogen peroxide in, possible microbicidal control mechanism, 2226
neutrophil-specific antigen (NB1) involved in pathogenesis of neonatal neutropenia, 1108
phagocytosing during infection, oxidant injury of glucose-6-phosphate dehydrogenase–deficient red blood cells by, 2466
polymorphonuclear, from patients with rheumatoid arthritis, chemotaxis of, 2541
polymorphonuclear, isolation and properties of phagocytic vesicles from, 1745

Leukotactic factors
complement-derived, in inflammatory synovial fluids of humans, 606

Levorphanol
morphine analogue, metabolic effects of on leukocytes at rest and during phagocytosis, 1091

Liddle's syndrome
abnormal membrane sodium transport in, 2253

Ligand kinetics
in hemoglobin Hiroshima, 1772

Light-chain metabolism
in experimental renal disease, renal handling of low molecular weight proteins, 901

Lipid
absorption, effect of neomycin on intraluminal phase of, 319
and glucose homeostasis in absence of human growth hormone, 574
and protein composition of arterial elastin, relationship to lipid accumulation in atherosclerotic plaque, 1666

Lipids
effect on growth hormone secretion in humans, 1439

Lipolysis
effect of inhibition of on myocardial oxygen consumption in presence of isoproterenol, 1869

Lipoprotein
abnormality in type III hyperlipoproteinemia, 754

Lipoprotein particles
synthesis and transport of by intestinal absorptive cells, in man, 2065

Lipoproteins
plasma, low and high density, electron microscopy study of in familial lecithin:cholesterol acyltransferase deficiency, 1141
plasma, low and high density, physical and chemical study of, in familial lecithin:cholesterol acyltransferase deficiency, 1131
very low density, biochemical and morphological study of in carbohydrate-induced hypertriglyceridemia, 1355

Liver
cirrhosis, fibrinogen metabolism in, 1690
cirrhosis, regional lung function in patients with, 2403
formation of triglyceride, inhibition by clofibrate, 2339
galactose-1-phosphate uridyl transferase, activity of in normal and galactosemic subjects, 500

of hamster, cholestasis induced by sodium taurolithocholate in, 2305

Liver disease
effects on transport of vitamin A in human plasma, 2426

Liver diseases
serum cholesterol esterifying and cholesteryl ester hydrolyzing activities in, 259

Lung disease
obstructive, ventilatory mechanics and expiratory flow limitation during exercise in patients with, 910

Lung function
in patients with hepatic cirrhosis, 2403

Lupus erythematosus
autoantibodies to nuclear antigens in, responsiveness to therapy, 350
human and mouse, inhibition of antibodies binding polyinosinic·polycytidylic acid in sera of, by viral and synthetic ribonucleic acids, 1248

Luteinizing hormone
dose response to luteinizing hormone–releasing hormone, in man, 1551

Lymph
renal, and arterial and renal venous plasma, angiotensin II, in dog, 119

Lymphocyte metabolism
effects of cyclic and noncyclic nucleotides on phytohemagglutinin stimulation, 442

Lymphocytes
cyclic 3′,5′-adenosine monophosphate in, alterations after phytohemagglutinin stimulation, 432
depressed reactivity of to phytohemagglutinin by renal failure serum, 1262
human, effect of salicylate on in vitro metabolism of, 226
human, interaction of macrophages and, in phytohemagglutinin-stimulated production of interferon, 744
human peripheral blood, effect of epsilon amino caproic acid and other inhibitors of proteolysis on response of to phytohemagglutinin, 1206
immunoglobulins on surface of, distribution in hypogammaglobulinemia, cellular immune deficiency, and chronic lymphatic leukemia, 2368
and kidney cells, comparison of HL-A phenotypes of by fluorochromasia cytotoxicity assay, 274
leukemic, defective control of ribosomal RNA processing in, 2485
mediators of histamine release from, 1044
rapid induction by phytohemagglutinin of increased α-aminoisobutyric acid uptake by, 818

Lysozyme
turnover in rat, 1473

M

α_2-Macroglobulin
plasma, kallikrein inhibitor, separation of plasma thromboplastin antecedent from kallikrein by, 2084
separation of into five components with different electrophoretic and enzyme-binding properties, 2376

Macrophage
alveolar, glutathione-dependent peroxidative metabolism in, 401
human alveolar, isolation, cultivation in vitro, and morphologic and functional characteristics of, 1390

Macrophages
alveolar, redox state of free nicotinamide-adenine nucleotides in cytoplasm and mitochondria of, 1181
human, interaction of lymphocytes and, in phytohemagglutinin-stimulated production of interferon, 744

Magnesium
depletion, pathogenesis of hypocalcemia in, normal end-organ responsiveness to parathyroid hormone, 2668

Malaria
alteration in rheologic properties of *Plasmodium knowlesi*–infected red blood cells, 1451

Malate
transport by decarboxylate carrier in rat liver mitochondria, inhibition by methylmalonic acid, 2276

Malignancy
chronic infection, and primary hematopoietic disease, serum level of erythropoietin in anemias associated with, 332

Maltose
circulating, metabolism of in man, 986

Manganese
distribution and metabolism of in monkey, studies of central nervous system and other organs, 9

Manganism
distribution and metabolism of manganese in central nervous system of monkey, 9

Marrow grafts
between canine siblings, matched by serotyping and mixed leukocyte culture, 1272

Mediterranean phenotype
of glucose-6-phosphate dehydrogenase, genetic diversity of, 1253

Membrane
of erythroid cell, activation by urea and localization to of ribonuclease, 60
potential difference of skeletal muscle in normal and severely ill subjects, 49

Membrane transport
of sodium in Liddle's syndrome, 2253

Membrano-proliferative glomerulonephritis
continuing C3 breakdown after bilateral nephrectomy in patients with, 552

Meningitis
bacterial, neuraminidase activity in, 979

Methemoglobinemia
hereditary, electrophoretic and functional variants of NADH-methemoglobin reductase in, 196

Methotrexate
binding of, in leukemic cells, 719

Methylmalonic acid
effect of malate transport by decarboxylate carrier in rat liver mitochondria, 2276

5-Methyltetrahydrofolate
transport characteristics of in cerebrospinal fluid, 1301

5-Methyltetrahydrofolic acid
intestinal absorption of, 1910

Micropuncture
and clearance study, postnatal development of renal function in dog, 779

Mineral changes
of bone during prolonged bed rest, effect of supplemental oral phosphate, 2506

Mitochondria
and cytoplasm of alveolar macrophages, redox state of free nicotinamide-adenine nucleotides in, 1181
inhibition by methylmalonic acid of malate transport by decarboxylate carrier in, in rat liver, 2276

Mitogen
effect of salicylate on metabolism of human lymphocytes in vitro, 226

Mitral stenosis
effect of atrial systole on ventricular function in, pressure-flow studies in man, 2653

Morphine analogue
levorphanol, metabolic effects of on leukocytes, at rest and during phagocytosis, 1091
Muscle
adaptation to exercise, increase of palmityl CoA synthetase, carnitine palmityltransferase, and palmityl CoA dehydrogenase, 2323
cardiac, mechanochemistry of, influence of thyroid state on energy utilization, 463
skeletal, resting transmembrane potential difference in normal and severely ill subjects, 49
and splanchnic glutamine and glutamate metabolism in postabsorptive and starved man, 814
tension prolongation during recovery from myocardial hypoxia, 660
Muscles
fast twitch and slow twitch, properties of fragmented sarcoplasmic reticulum from, 570
Myeloperoxidase
hydrogen peroxide utilization in leukocytes deficient in, possible microbicidal control mechanism, 2226
Myocardial
hypoxia, tension prolongation during recovery from, 660
Myocardial function
and oxygen consumption, effect of free fatty acids on, in intact dogs, 1386
Myocardial infarction
chronotropic augmentation of cardiac function in left ventricular failure of acute and healing stages in intact conscious dogs, 217
effects of intra-aortic counterpulsation on cardiac performance and metabolism in shock associated with, 1885
influence of scar on left ventricular performance at onset of, shock versus heart failure, 534
left ventricular function in, 523
quantitative assessment of by analysis of serial changes in serum creatine phosphokinase activity, 2614
Myocardium
activation of adenyl cyclase in by histamine, in guinea pig, cat, and human, 1012
effect of inhibition of lipolysis on oxygen consumption by, in presence of isoproterenol, 1869
effects of nitroglycerin on regional blood flow of, in coronary artery disease, 1578
mechanochemistry of, influence of thyroid state on energy utilization, 463
regulation of performance of by carotid sinus baroreceptors, 1116
Myotonia congenita
cable parameters, sodium, potassium, chloride, water content, and potassium efflux in isolated external intercostal muscles in, 2091

N

NADH-methemoglobin reductase
electrophoretic and functional variants of, in hereditary methemoglobinemia, 196
Natriuresis
induced by volume expansion, humoral mechanism in, 1603
Neomycin
action on intraluminal phase of lipid absorption, 319
Neonatal neutropenia
neutrophil-specific antigen (NB1) involved in pathogenesis of, 1108
Nephrectomy
bilateral, continuing C3 breakdown after, in patients with membranoproliferative glomerulonephritis, 552
Nephritogenic streptococci
changing types of, in Trinidad, 1197
Nephron
of rat, urate transport in, 35
Nephron function
in postobstructive kidney, of dog, 1154
Nephron reduction
and potassium excretion, in dog, 1061
Nerve tissue
relationship of transketolase of to neuropathy in chronic uremia, 2295
Neuraminidase
activity in bacterial meningitis, 979
Neuropathy
in chronic uremia, relationship of nerve tissue transketolase to, 2295
Neutropenia
chronic steady-state, blood neutrophil kinetics in, 1678
Neutrophil
candidacidal activity, synthesis, degradation, and effects of cyclic 3′,5′-adenosine monophosphate on, 920
human antigen (NB1) specific for, in pathogenesis of neonatal neutropenia, 1108
Neutrophils
blood, kinetics of in chronic steady-state neutropenia, 1678
human, inhibition by sulfonamides of candidacidal activity of, 2498
and lysozyme turnover in rat, 1473
Newborn infants
normal and erythroblastotic, endogenous production of carbon monoxide, 1
Nitrogen balance
capacity of human subjects to utilize keto analogues of valine and phenylalanine, 90
Nitroglycerin
effect on regional myocardial blood flow in coronary artery disease, 1578
Noradrenaline
(norepinephrine), decreased synthesis of in familial dysautonomia, 2734
Norepinephrine
(noradrenaline), decreased synthesis of in familial dysautonomia, 2734
Norepinephrine metabolism
human, evaluation of by administration of tritiated norepinephrine, 859
Norethandrolone
effect of on transport and peripheral metabolism of thyroxine, in patients lacking thyroxine-binding globulin, 1644
Nucleotides
cyclic and noncyclic, effect on phytohemagglutinin stimulation in human lymphocytes, 442
free nicotinamide-adenine, redox state of, in cytoplasm and mitochondria of alveolar macrophages, 1181

O

Obesity
experimental, in man, cellular character of adipose tissue, 1005
Oncotic pressure
and sodium reabsorption, role of postglomerular vascular protein concentration, 336
Orotidine decarboxylase
and orotidylate phosphoribosyltransferase, coordinate activity and lability of in human erythrocytes, effects of allopurinol, 1050
Orotidylate phosphoribosyltransferase
and decarboxylase, coordinate activity and lability of in human erythrocytes, effects of allopurinol, 1050
Ouabain
effects of cardiac depression and anesthesia on myocardial action of, 2585
Ovariectomy
effect on gonadotropin release, 1149
Oxidant injury
of glucose-6-phosphate dehydrogenase–deficient red blood cells by phagocytosing leukocytes during infection, 2466

Oxygen affinity
of hemoglobin, regulatory mechanisms of in acidosis and alkalosis, 700
Oxygen consumption
by myocardium, effect of inhibition of lipolysis on, in presence of isoproterenol, 1869
and myocardial function, effect of free fatty acids on, in intact dogs, 1386
Oxygen equilibrium
of hemoglobin J Cape Town, 1554

P

Paget's disease
of bone, clinical and metabolic effects of porcine calcitonin, 1927
Palmitate
increased oxidation of in exercising muscle, 2323
Pancreas
isolated perfused, secretion of glucagon from, 2123
Paralysis
hyperkalemic periodic, changes in plasma sodium and chloride, induction of paralysis by adrenal glucocorticoids, 142
Parathyroid extract
and calcitonin, renal effects of, hypoparathyroidism in man, 2689
Parathyroid hormone
and cyclic 3′,5′-adenosine monophosphate, mode of action on renal tubular phosphate reabsorption, in dog, 617
human, radioimmunoassay of in serum, 21
normal end-organ responsiveness to, pathogenesis of hypocalcemia in magnesium depletion, 2668
serum immunoreactive, etiology of hyperparathyroidism and bone disease during chronic hemodialysis, 599
Parathyroidism
hyper-, plasma insulin disturbances in, 2596
hyper-, primary and due to nonparathyroid cancer, immunologic differentiation of, 2079
Penicillin
effect on uptake of streptomycin by enterococci, 2580
Peritoneal membrane
response to antidiuretic hormone, 2437
Peroxidase metabolism
dependent on glutathione, in alveolar macrophage, 401
pH
of blood, pulmonary vasopressor response to decreases of, in dog, 1028
Phagocytosis
by human alveolar macrophage, 1390
effect of polystyrene beads on cyclic AMP concentration in leukocytes, 2741
glutathione-dependent peroxidative metabolism in alveolar macrophage, 401
isolation and properties of vesicles from polymorphonuclear leukocytes, 1745
metabolic effects of morphine analogue levorphanol on leukocytes during, 1091
oxidant injury of glucose-6-phosphate dehydrogenase–deficient red blood cells by leukocytes during infection, 2466
Phenobarbital
effect on bilirubin excretion in rats with normal and impaired bilirubin conjugation, 2606
Phenotypes
HL-A, of lymphocytes and kidney cells, comparison of by fluorochromasia cytotoxicity assay, 274
Phenylalanine
and valine, capacity of human subjects to utilize keto analogues of, 90
Phosphatase
serum alkaline, in hypophosphatasia, 2137
Phosphate
supplemental oral, effect on bone mineral changes during prolonged bed rest, 2506
Phosphate-^{32}P
quantification of human platelet inositides and influence of ionic environment on incorporation of, 762
Phosphate reabsorption
renal tubular, mode of action of parathyroid hormone and cyclic 3′,5′-adenosine monophosphate on, in dog, 617
Phosphorus
formation, mineralization, and resorption of bone in hypophosphatemic rats, 2519
renal handling of in oliguric and nonoliguric mercury-induced acute renal failure, in rats, 2347
Photocatabolism
of labeled bilirubin in congenitally jaundiced (Gunn) rat, 707
Physiological measure
of disease activity in rheumatoid arthritis, 1167
Phytohemagglutinin
depressed reactivity of lymphocytes to by renal failure serum, 1262
effect of epsilon amino caproic acid and other proteolysis inhibitors on response of human peripheral blood lymphocytes to, 1206
effect on cyclic 3′,5′-adenosine monophosphate in human lymphocytes, 432
effects of cyclic and noncyclic nucleotides on stimulation by, in human lymphocytes, 442
rapid induction by of increased α-aminoisobutyric acid uptake by lymphocytes, 818
stimulation by of interferon production, interaction of human macrophages and lymphocytes, 744
Placenta
secretion of lactogen by, in monkey, 2660
transport of vitamin B_{12}, in rat, 1000
Plasma
arterial and renal venous, and renal lymph, angiotensin II, in dog, 119
and bile, of man, folates in after feeding folic acid-^{3}H and 5-formyltetrahydrofolate (folinic acid), 455
estradiol, index of fetoplacental function, 1490
measurement of human prolactin in, by in vitro bioassay, 1557
thromboplastin antecedent, separation of from kallikrein by plasma α_2-macroglobulin, kallikrein inhibitor, 2084
Plasmodium knowlesi
alteration in rheologic properties of red blood cells infected by, 1451
Platelet
adhesion to collagen fibers, 1854
collagen-induced aggregation of, inhibition of by normal plasma, 2168
human, quantification of inositides of, influence of ionic environment on incorporation of orthophosphate-^{32}P, 762
storage at 22°C, metabolic, morphologic, and functional studies in, 370
Platelets
human blood, effect of dibutyryl cyclic 3′,5′-adenosine monophosphate on function of, 131
mediators of histamine release from, 1044
Pollen allergy
immunologic and cellular changes accompanying therapy of, 360
Polyinosinic·polycytidylic acid
in human and mouse lupus sera, inhibition of antibodies binding, by viral and synthetic ribonucleic acids, 1248
Polymorphism
hypomorphic variant of human C3, 324
Polyol pathway
role in metabolic alterations in hu-

man erythrocyte produced by increases of glucose, 2104
Polystyrene beads
effect of on cyclic AMP concentration in leukocytes, 2741
Porphyria
acute intermittent, measurement of synthesis of bilirubin from hepatic hemes in, 2259
Postnatal development
of renal function, intracortical distribution of number and volume of glomeruli, in dog, 796
of renal function, micropuncture and clearance studies, in dog, 779
Posture
and isoproterenol, effects of on velocity of left ventricular contraction, in man, 2283
Potassium
effect of diphenylhydantoin on transport of in isolated nerve terminals, 1977
hyperkalemic periodic paralysis, changes in plasma sodium and chloride, induction of paralysis by adrenal glucocorticoids, 142
in myotonia congenita, 2091
wasting, in renal tubular acidosis, 667
Potassium excretion
and nephron reduction, in dog, 1061
Potassium wasting
in renal tubular acidosis associated with Fanconi syndrome (type 2 RTA), 231
Potential
transtubular, effect of flow rate on, in rabbit proximal tubule, 2745
Potential difference
resting transmembrane, of skeletal muscle in normal and severely ill subjects, 49
Pregnancy
and estradiol and progesterone, effects on plasma insulin and pancreatic islet insulin secretion, 992
molar, thyroid hormone economy, 1345
Pregnanetriol
and Δ^5-pregnenetriol, urinary excretion of in congenital adrenal hyperplasia, 2751
Pressure-flow study
effect of atrial systole on ventricular function in mitral stenosis, in man, 2653
Progeria
cell culture study on aging, 2000
Proinsulin
direct measurement of in human plasma by use of insulin-degrading enzyme, 1792
Proinsulin-like component
of circulating insulin in basal state and in patients and hamsters with islet cell tumors, 2113
Proinsulin-like properties
of "big" insulin in patients without islet cell tumors, 849
Prolactin
human, measurement in plasma by in vitro bioassay, 1557
Properdin
glomerular deposition of, in acute and chronic glomerulonephritis with hypocomplementemia, 642
Propionyl-CoA carboxylase
inherited deficiency in "ketotic hyperglycinemia," 127
Prostaglandin E_1
and calcium, effects of on vasopressin activation of renal adenyl cyclase, 1613
and vasopressin, effect of on adenyl cyclase-cyclic 3′,5′-adenosine monophosphate system of renal medulla, of rat, 2461
Prostaglandins
and cholera enterotoxin, stimulation of intestinal mucosal adenyl cyclase by, 1218
Protein
cold-precipitable, with complement-fixing activity in rheumatoid synovial fluid, 282
IgG, IgA, IgM, and albumin, hypercatabolism of in Wiskott-Aldrich syndrome, 2331
and lipid composition of arterial elastin, relationship to lipid accumulation in atherosclerotic plaque, 1666
and lipid content, age, and nutritional state of adipose cells, influence on insulin sensitivity, 1399
of red blood cell membranes in hereditary spherocytosis, 1800
Protein concentration
postglomerular vascular, role in fluid reabsorption and glomerulotubular balance by renal proximal tubule, 336
Protein synthesis
increased synthesis of heme-free β^{GH} globin chain and subunit exchange with free α-chain pool, in hemoglobin Gun Hill, 388
Proteins
low molecular weight, light-chain metabolism in experimental renal disease, 901
Proteins Y and Z
hepatic cytoplasmic organic anion-binding, effect of drugs, chemical, hormones, and cholestasis, 2242
Proteolysis
effect of epsilon amino caproic acid and other inhibitors of on response of human peripheral blood lymphocytes to phytohemagglutinin, 1206
Protoporphyrin
multiple sites of excess formation of, in erythropoietic protoporphyria, 203
Proximal reabsorption
effect of saline infusion on intrarenal distribution of glomerular filtrate and, in dog, 514
Proximal tubule
depression of sodium reabsorption by, in response to renal beta adrenergic stimulation by isoproterenol, in dog, 112
fluid reabsorption and volume depletion in, 1379
fractional reabsorption of during saline infusion and aortic constriction, in rat, 2191
function of in dogs with thoracic caval constriction, 2150
independent roles of reabsorption of and intratubular load in glomerulotubular balance during aortic constriction, in rat, 77
of normal and nephrotic rats, micropuncture studies of albumin concentrations in, 1498
of volume-expanded rat, inhibition of fluid reabsorption by, 1596
renal, transport of sodium chloride and water in, 69
Pteroylpolyglutamates
folate absorption in dog after exposure of isolated intestine to, 2009
Pulmonary
artery pressure and alveolar gas exchange in man during acclimatization to high altitude, 827
Pulmonary circulation
during alveolar hypoxia and serotonin and histamine infusion, in dog, 2550
vasopressor response to decreases in blood pH, in dog, 1028
Pulmonary embolism
clinical study of hypoxemia in, 481
spontaneous fibrinolysis in, 474
Pulmonary physiology
deposition and clearance of 2 μ particles in tracheobronchial tree of normal subjects, smokers and nonsmokers, 1411
regional lung function in patients with hepatic cirrhosis, 2403
Pyridoxine
conversion of to active forms in red blood cell, 1901
Pyrophosphate
in plasma of normal persons and patients with hypophosphatasia, osteogenesis imperfecta, and other bone disorders, 961
Pyruvate kinase
erythrocyte deficiency, selective reticulocyte destruction in, 688

R

Radioimmunoassay
for measurement of triiodothyronine in human serum, 2033
of human parathyroid hormone in serum, 21

Red blood cell
conversion of vitamin B_6 compounds to active forms in, 1901
life-span in newborn infants, 1

Red blood cells
abnormal membrane protein of in hereditary spherocytosis, 1800
aging in vivo, 1373
deficient in glucose-6-phosphate dehydrogenase, oxidant injury of by phagocytosing leukocytes during infection, 2466
genetic diversity of Mediterranean glucose-6-phosphate dehydrogenase deficiency phenotype, 1253
increased synthesis of heme-free β^{GH} globin chain and subunit exchange with free α-chain pool, in hemoglobin Gun Hill, 388
infected by *Plasmodium knowlesi*, alteration in rheologic properties of, 1451
with inclusion bodies, in hemoglobin Savannah, 650

Redox state
of free nicotinamide-adenine nucleotides in cytoplasm and mitochondria of alveolar macrophages, 1181

Renal blood flow
and renin, in hemorrhagic hypotension, 970

Renal disease
handling of low molecular weight proteins, L-chain metabolism in, 901
inhibition of sodium reabsorption after saline load, in dog and man, 422

Renal failure
defective cellular immunity, depression of reactivity of lymphocytes to phytohemagglutinin, 1262

Renal function
postnatal development in dog, intracortical distribution of number and volume of glomeruli, 796
postnatal development in dog, micropuncture and clearance studies, 779

Renal insufficiency
chronic, pathogenesis of hyperparathyroidism in, in dog, 493

Renal physiology
glomerular filtration pressure and single nephron filtration rate during hydropenia, elevated ureteral pressure, and acute volume expansion, 2230

Renal tubular acidosis
renal potassium wasting in, 667

Renal tubule
phosphate reabsorption, mode of action of parathyroid hormone and cyclic 3′,5′-adenosine monophosphate on, in dog, 617

Renal vein
constriction, effect on sucrose permeability of proximal tubule, in rat, 294

Renin
and intrarenal hemodynamics in hemorrhagic hypotension, 970

Respiration
ventilatory mechanics and expiratory flow limitation during exercise in patients with obstructive lung disease, 910

Reticulocyte
selective destruction of in reythrocyte pyruvate kinase deficiency, 688

Reticulocytes
normal human, isolation and translation of hemoglobin messenger RNA from, 2458

Retinol-binding protein
effects of liver, thyroid, and kidney diseases on, 2426

Rheology
of *Plasmodium knowlesi*—infected red blood cells, 1451

Rhesus monkey
alterations in thyroid hormone economy during acute infection with *Diplococcus pneumoniae* in, 378

Rheumatic diseases
relation of autoantibodies to nuclear antigens with clinical patterns of, responsiveness to therapy, 350

Rheumatoid
synovial collagenase, in vitro and in vivo, 2056

Rheumatoid arthritis
chemotaxis of polymorphonuclear leukocytes in, 2541
complement-derived leukotactic factors in inflammatory synovial fluids of humans, 606
physiological approach to assessment of disease activity in, 1167

Rheumatoid synovial fluid
cryoproteins with complement-fixing activity in, 282

Rheumatoid synovium
response of to exogenous immunizations, 266

Ribonuclease
of erythroid cell, activation by urea and localization to cell membrane, 60

Ribonucleic acid
messenger, for human hemoglobin synthesis, defect in beta thalassemia, 2755
messenger, isolation and translation of from hemoglobin of thalassemia, sickle cell anemia, and normal human reticulocytes, 2458
of ribosomes in leukemic lymphocytes in, defective control of processing of, 2485
synthesis of in toad bladder epithelium, action of aldosterone during latent period, 543

Ribonucleic acids
viral and synthetic, inhibition of antibodies binding polyinosinic·polycytidylic acid in human and mouse lupus sera by, 1248

Ribosomes
of leukemic lymphocytes, defective control of RNA processing in, 2485

S

Salicylate
effect on metabolism of normal and stimulated human lymphocytes in vitro, 226

Saline
effect on intrarenal distribution of glomerular filtrates and proximal reabsorption, in dog, 514

Saline infusion
and aortic constriction, proximal tubular fractional reabsorption during, in rat, 2191

Sarcoplasmic reticulum
fragmented, from fast twitch and slow twitch muscles, 570

Sarcosine
transport and metabolism of in hypersarcosinemic and normal phenotypes, 2313

Scar
influence of on left ventricular performance at onset of myocardial ischemia, shock versus heart failure, 534

Scleroderma
skin capillary blood flow in, 930

Secretin
interaction with gastrin, hormonal regulation of human lower esophageal sphincter, 449

Serotonin
and histamine infusion, and alveolar hypoxia, pulmonary vasomotor reactivity during, in dog, 2550

Serotyping
and mixed leukocyte culture, marrow grafts between canine siblings matched by, 1272

Serum
human, with cytotoxic activity, 1514
uremic, inhibition of transepithelial sodium transport in frog skin by low molecular weight fractions of serum in, 303

Shock
and acute myocardial infarction, effects of intra-aortic counterpulsation on cardiac performance and metabolism in, 1885
and heart failure, influence of scar on left ventricular performance at onset of myocardial ischemia, 534
left ventricular function in acute myocardial infarction, 523

Sickle cell anemia
isolation and translation of hemoglobin messenger RNA from, 2458

Skin
capillary blood flow in scleroderma, 930

Skin infection
and changing types of nephritogenic streptococci, in Trinidad, 1197

Sodium
abnormal membrane transport of in Liddle's syndrome, 2253
and carbonate, changes of in bone in metabolic acidosis and alkalosis, in dog, 327
and chloride, plasma changes of and induction of paralysis by adrenal glucocorticoids in hyperkalemic periodic paralysis, 142
excretion, in postobstructive kidney, of dog, 1154
in myotonia congenita, 2091
plasma concentration of, and vascular reactivity, in man, 2022
reabsorption, by proximal tubule, depression of in response to renal beta adrenergic stimulation by isoproterenol, in dog, 112
and water, decreased absorption of by intestine after acute volume expansion, in rat, 2355

Sodium chloride
by proximal tubule, effect of cyclic 3′,5′- adenosine monophosphate on regulation of, 1231
by renal proximal tubule, effect of postglomerular vascular protein concentration, 336
inhibition of by renal proximal tubule of volume-expanded rat, 1596
inhibition of in diseased kidney of dog and man after saline load, 422
and water, transport of in renal proximal tubule, 69

Sodium transport
action of aldosterone during latent period of, kinetics of RNA synthesis in toad bladder epithelium, 543
transepithelial, in frog skin, inhibition of by low molecular weight fraction of uremic serum, 303

Sodium-potassium ATPase
in medulla and cortex of kidney, 1329

Spherocytosis
hereditary, abnormal membrane protein of red blood cells in, 1800

Splanchnic
and muscle glutamine and glutamate metabolism in postabsorptive and starved man, 814

Starvation
effect on metabolic response to human growth hormone, 411
in human, forearm metabolism during, 1536

Steroids
estradiol and progesterone, effects on plasma insulin and pancreatic islet insulin secretion, 992
pregnanetriol and Δ^5-pregnenetriol, urinary excretion of in congenital adrenal hyperplasia, 2751

Streptococci
nephritogenic, changing types of, in Trinidad, 1197

Streptomycin
effect of antibiotics on uptake of by enterococci, 2580

Sucrose
consumption and insulin infusion, diurnal fluctuations in triglyceride, free fatty acids, and insulin during, in man, 583
permeability of rat proximal tubule, effect of renal vein constriction on, 294

Sulfonamides
inhibition by of candidacidal activity of human neutrophils, 2498

Synovial collagenase
rheumatoid, in vitro and in vivo studies, 2056

Synovial fluid
rheumatoid, cryoproteins with complement-fixing activity in, 282

Synovial fluids
inflammatory, human, complement-derived leukotactic factors in, 606

Synovial membrane
rheumatoid, response of to exogenous immunization, 266

Synthetases
glutamylcysteine and glutathione, purification of from human erythrocytes, 1637

Systoles
auxotonic, estimation of V_{max} in, from rate of relative increase of isovolumic pressure: (dP/dt)kP, 1276

T

Taurolithocholate
induction of cholestasis by, in isolated hamster liver, 2305

Testosterone
conversion of to plasma dihydrotestosterone in humans, 1621

Thalassemia
defect in messenger RNA for human hemoglobin synthesis in, 2755
and hemoglobin H disease, relation of hemoglobin anomaly to, 1628
isolation and translation of hemoglobin messenger RNA from, 2458

Thrombin
measurement of in human plasma, 2355

Thromboplastin antecedent
separation of from kallikrein by plasma α_2-macroglobulin, kallikrein inhibitor, 2084

Thyroid
influence of on energy utilization in cardiac muscle, 463

Thyroid disease
effects of on glucose oxidative metabolism in man, compartmental model analysis, 627
effects on transport of vitamin A in human plasma, 2426

Thyroid function
effects of nitrotyrosine on, in rat, model for dehalogenase defect, 2474

Thyroid hormone
alterations in economy of during acute infection with *Diplococcus pneumoniae* in rhesus monkey, 378
in patients with hydatidiform mole, 1345

Thyrotropin-releasing factor
effect on serum thyroid-stimulating hormone, hypothalamic and pituitary forms of hypopituitary dwarfism, 2219

Thyroxine
effects of norethandrolone on transport and peripheral metabolism of, in patients lacking thyroxine-binding globulin, 1644
extrathyroidal conversion of to 3,5,-3′-triiodothyronine, in rat, 1124
extrathyroidal conversion rate of to triiodothyronine, in normal man, 1187

Thyroxine-binding globulin
preparation and properties of, 1758

Tissue typing
comparison of HL-A phenotypes of lymphocytes and kidney cells by fluorochromasia cytotoxicity assay, 274

Titration curve
carbon dioxide, influence of hypercapnia on, 208

Tobacco
deposition and clearance of 2 μ particles in tracheobronchial tree of normal subjects, smokers and nonsmokers, 1411

Tonsillar cells
immunoglobulin synthesis in, absence of light-heavy-chain assembly, hereditary IgA abnormality, 2726
Tracheobronchial tree
of normal subjects, smokers and nonsmokers, deposition and clearance of 2 μ particles in, 1411
Transketolase
of nerve tissue, relationship to neuropathy in chronic uremia, 2295
Triglyceride
and cholesterol, of chylomicrons, metabolism by liver and extrahepatic tissues of sheep and dogs, 1831
formation in liver, inhibition by clofibrate, 2339
free fatty acids and insulin, diurnal fluctuations in during sucrose consumption and insulin infusion, in man, 583
Triiodothyronine
extrathyroidal formation of from thyroxine, in normal man, 1187
in human serum, radioimmunoassay for, 2033
measurements in human serum by radioimmunoassay with corroboration by gas-liquid chromatography, 2679
3,5,3′-Triiodothyronine
extrathyroidal conversion of thyroxine to, in rat, 1124
Tryptophan
reversal of alcohol-induced depression of albumin synthesis, 1812
Tubule
proximal, of rabbit, flow dependence of transtubular potential difference in, 2745
Tyrosine
3-nitro-, effects of on thyroid function, in rat, model for dehalogenase defect, 2474

U

Ultrafiltration
glomerular, dynamics of, in rat, 1776
Urate transport
in rat nephron, 35
Urea
activation by of erythroid cell ribonuclease, 60
Uremia
chronic, relationship of nerve tissue transketolase to neuropathy in, 2295
inhibition of transepithelial sodium transport in frog skin by low molecular weight fraction of serum in, 303
Uridyl transferase
galactose-1-phosphate, activity in livers of normal and galactosemic subjects, 500

V

V_{max}
estimation of in auxotonic systoles from rate of relative increase of isovolumic pressure: (dP/dt)kP, 1276
Valine
and phenylalanine, capacity of human subjects to utilize keto analogues of, 90
Vascular reactivity
and plasma sodium concentration, in man, 2022
Vascular response
peripheral, to exercise before and after complete heart block, in dogs, 1950
Vasodilatation
renal, effect of on distribution of cortical blood flow, in dog kidney, 1429
Vasopressin
activation of renal adenyl cyclase, effects of calcium and prostaglandin E_1 on, 1613
effect on water diffusion across toad bladder, evidence against pore enlargement hypothesis, 1016
"essential" hypernatremia due to ineffective osmotic and intact volume regulation of secretion of, 97
and prostaglandin E_1, effects of on adenyl cyclase-cyclic 3′,5′-adenosine monophosphate system of renal medulla, of rat, 2461
Vena cava
thoracic constriction, proximal tubular function in dogs with, 2150
Ventilation control
acquired attenuation of chemoreceptor function in chronically hypoxic man at high altitude, 186
Ventilatory mechanics
and expiratory flow limitation during exercise in patients with obstructive lung disease, 910
Ventricle
left, effects of posture and isoproterenol on velocity of contraction of, in man, 2283
left, performance of, and coronary flow after coronary embolization with plastic microspheres, 1656
right, performance of under stress, relation to right coronary flow, 2176
Ventricular arrhythmias
induced in monkeys by inhalation of aerosol propellants, 1546
Ventricular function
effect of atrial systole on in mitral stenosis, pressure-flow studies in man, 2653
effects of cardiac depression and anesthesia on action of cardiac glycoside, 2585
estimation of V_{max} in auxotonic systoles from rate of relative increase of isovolumic pressure: (dP/dt)kP, 1276
left, in acute myocardial infarction, 523
left, influence of scar on, at onset of myocardial ischemia, shock versus heart failure, 534
Vesicles
phagocytic, from polymorphonuclear leukocytes, 1745
Vitamin A
transport in human plasma, effects of liver, thyroid, and kidney diseases on, 2426
Vitamin B_6 compounds
conversion of to active forms in red blood cell, 1901
Vitamin B_{12}
placental transport of, in rat, 1000
uptake by intestinal microorganisms, relevance to syndromes of intestinal bacterial overgrowth, 1100
Vitamin D
and cortisone, effect on active transport of calcium by small intestine, 1309
turnover and transport of, in human plasma, 2159
Vitamin D_3
storage in body fat, in rat, 679
Volume depletion
and fluid reabsorption in proximal tubule, 1379
Volume expansion
effect on intestinal sodium and water absorption, in rat, 2355
extracellular, effect on intestinal transport of water and electrolytes, in dogs, 2569
extracellular fluid, effect of on glucose reabsorption rate and glomerular tubular balance in single rat nephron, 2414
natriuresis, humoral mechanism in, 1603
Volume regulation
of vasopressin secretion, "essential" hypernatremia and hyperosmolality, 97
Volume-expanded rat
inhibition of fluid reabsorption by renal proximal tubule of, 1596
von Willebrand's disease
and classic hemophilia (factor VIII deficiency), immunologic differentiation of, 244

W

Water
abnormal diuresis in anterior hypopituitarism in man, role of antidiuretic hormone, 1478
and electrolytes, colonic secretion of induced by bile acids, perfusion studies in man, 1569
and electrolytes, intestinal transport of, during extracellular volume expansion, in dogs, 2569
and sodium chloride, transport of in renal proximal tubule, 69
and sodium, decreased absorption of by intestine after acute volume expansion, in rat, 2355

Water content
in myotonia congenita, 2091

Water diffusion
across toad bladder, activation energy for, evidence against pore enlargement hypothesis, 1016

Wiskott-Aldrich syndrome
hypercatabolism of IgG, IgA, IgM, and albumin in, 2331

X

Xenon
measurement of skin capillary blood flow in scleroderma with, 930

Xylitol
use in glucose-6-phosphate dehydrogenase deficiency anemia, 1421
